Fortuna, G.. Rizzotto, M. Lavorgna, G. Nunnari, M.G. Xibilia, Riccardo Caponetto, 2012-03-26 The book presents a clear understanding of a new type of computation system the Cellular Neural Network CNN which has been successfully applied to the solution of many heavy computation problems mainly in the fields of image processing and complex partial differential equations The text describes how CNN will improve the soft computation toolbox and examines the many applications of soft computing to complex systems *Soft Computing* L. Fortuna, G.. Rizzotto, M. Lavorgna, G. Nunnari, M.G. Xibilia, Riccardo Caponetto, 2001-05-16 The book presents a clear understanding of a new type of computation system the Cellular Neural Network CNN which has been successfully applied to the solution of many heavy computation problems mainly in the fields of image processing and complex partial differential equations The text describes how CNN will improve the soft computation toolbox and examines the many applications of soft computing to complex systems *Concepts of Soft Computing* Snehashish Chakraverty, Deepti Moyi Sahoo, Nisha Rani Mahato, 2019-04-30 This book discusses soft computing which provides an efficient platform to deal with imprecision uncertainty vagueness and approximation in order to attain robustness and reliable computing It explores two major concepts of soft computing fuzzy set theory and neural networks which relate to uncertainty handling and machine learning techniques respectively Generally fuzzy sets are considered as vague or uncertain sets having membership function lying between 0 and 1 and ANN is a type of artificial intelligence that attempts to imitate the way a human brain works by configuring specific applications for instance pattern recognition or data classification through learning processes The book also presents C MATLAB programming codes related to the basics of fuzzy set interval arithmetic and ANN in a concise practical and adaptable manner along with simple examples and self validation unsolved practice questions in few cases **New Trends and Applications in Internet of Things (IoT) and Big Data Analytics** Rohit Sharma, Dilip Sharma, 2022-05-16 This book focuses on the use of The Internet of Things IoT and

big data in business intelligence data management Hadoop machine learning cloud smart cities etc IoT and big data emerged from the early 2000s data boom driven forward by many of the early internet and technology companies The Internet of Things IoT is an interconnection of several devices networks technologies and human resources to achieve a common goal There are a variety of IoT based applications being used in different sectors and have succeeded in providing huge benefits to the users The generation of big data by IoT has ruptured the existing data processing capacity of IoT and recommends to adopt the data analytics to strengthen solutions The success of IoT depends upon the influential association of big data analytics New technologies like search engines mobile devices and industrial machines provided as much data as companies could handle and the scale continues to grow In a study conducted by IDC the market intelligence firm estimated that the global production of data would grow 10x between 2015 and 2020 So the proposed book covers up all the aspects in the field discuss above *New Trends in Intelligent Software Methodologies, Tools and Techniques* Ali Selamat, Sigeru

Omatu, 2017-09-15 Software is an essential enabler for science and the new economy It creates new markets and directions for a more reliable flexible and robust society and empowers the exploration of our world in ever more depth but it often falls short of our expectations Current software methodologies tools and techniques are still neither robust nor reliable enough for the constantly evolving market and many promising approaches have so far failed to deliver the solutions required This book presents the keynote Engineering Cyber Physical Systems and 64 peer reviewed papers from the 16th International Conference on New Trends in Intelligent Software Methodology Tools and Techniques SoMeT_17 held in Kitakyushu Japan in September 2017 which brought together researchers and practitioners to share original research results and practical development experience in software science and related new technologies The aim of the SoMeT conferences is to capture the essence of the new state of the art in software science and its supporting technology and to identify the challenges such technology will have to master The book explores new trends and theories which illuminate the direction of developments in this field and will be of interest to anyone whose work involves software science and its integration into tomorrow's global information society *Soft Computing in Green and Renewable Energy Systems* Kasthurirangan Gopalakrishnan, Siddhartha

Soft Computing and Its Engineering Applications Kanubhai K. Patel, K. C. Santosh, Atul Patel, Ashish Ghosh, 2023-03-07 This book constitutes the refereed proceedings of the 4th International Conference on Soft Computing and its Engineering Applications icSoftComp 2022 held in Changa Anand India during December 9 10 2022 The 33 full papers and 3 short papers included in this book were carefully reviewed and selected from 342 submissions They were organized in topical sections as follows Theory and Methods Systems and Applications and Hybrid Techniques New Trends in Neutrosophic Theory and Applications Florentin Smarandache (editor), Surapati Pramanik (editor), 2016-11-05 Neutrosophic theory and applications have been expanding in all directions at an astonishing rate especially after the introduction the journal entitled Neutrosophic Sets and Systems New theories techniques algorithms have been rapidly developed One of the most striking trends in the neutrosophic theory is the hybridization of neutrosophic set with other potential sets such as rough set bipolar set soft set hesitant fuzzy set etc The different hybrid structure such as rough neutrosophic set single valued neutrosophic rough set bipolar neutrosophic set single valued neutrosophic hesitant fuzzy set etc are proposed in the literature in a short period of time Neutrosophic set has been a very important tool in all various areas of data mining decision making e learning engineering medicine social science and some more The book *New Trends in Neutrosophic Theories and Applications* focuses on theories methods algorithms for decision making and also applications involving neutrosophic information Some topics deal with data mining decision making e learning graph theory medical diagnosis probability theory topology and some more 30 papers by 39 authors and coauthors Applied Soft Computing Technologies: The Challenge of Complexity Ajith Abraham, Bernard de Baets, Mario Köppen, Bertram Nickolay, 2006-08-11 This volume presents the proceedings of the 9th Online World Conference on Soft Computing in Industrial Applications held on the World Wide Web in 2004 It includes lectures original papers and tutorials presented during the conference The book brings together outstanding research and developments in soft computing including evolutionary computation fuzzy logic neural networks and their fusion and its applications in science and technology **Soft Sensors for Monitoring and Control of Industrial Processes** Luigi Fortuna, Salvatore Graziani, Alessandro Rizzo, Maria Gabriella Xibilia, 2007-05-31 focussed on the key steps in soft sensor design data selection model structure selection and model validation respectively Extensions to the basic steps of soft sensor design namely soft sensor performance enhancement and the modifications needed to facilitate different industrial process applications follow in Chapter 7 and 8 respectively Widening the applications range and role of soft sensors to fault detection and sensor validation configurations is dealt with in Chapter 9 A great strength of *Soft Sensors for Monitoring and Control of Industrial Processes* is the use throughout the text of a set of industrial case studies to demonstrate the successes and drawbacks of the different methods used to create soft sensor models A number of different methods may be used in each

separate step of the soft sensor design process and the industrial case studies are often used to provide explicit comparisons of the performance of these methods. The industrial control and process engineer will find these comparison exercises invaluable illustrations of the sort of results that might be found in industrial applications. The monograph also highlights the importance of using knowledge from industrial experts and from the existing industrial process literature. This is an important aspect of industrial control that is not very widely acknowledged or taught in control courses. Most industrial processes have already generated a significant experimental knowledge base and the control engineer should develop ways of tapping into this valuable resource when designing industrial control schemes.

Soft Computing for Hybrid Intelligent Systems Oscar Castillo, Patricia Melin, Witold Pedrycz, 2008-09-10 We describe in this book new methods and applications of hybrid intelligent systems using soft computing techniques. Soft Computing (SC) consists of several intelligent computing paradigms including fuzzy logic, neural networks, and evolutionary algorithms which can be used to produce powerful hybrid intelligent systems. The book is organized in five main parts which contain a group of papers around a similar subject. The first part consists of papers with the main theme of intelligent control which are basically papers that use hybrid systems to solve particular problems of control. The second part contains papers with the main theme of pattern recognition which are basically papers using soft computing techniques for achieving pattern recognition in different applications. The third part contains papers with the themes of intelligent agents and social systems which are papers that apply the ideas of agents and social behavior to solve real world problems. The fourth part contains papers that deal with the hardware implementation of intelligent systems for solving particular problems. The fifth part contains papers that deal with modeling, simulation, and optimization for real world applications.

New Trends in Neutrosophic Theory and Applications, Volume II Florentin Smarandache, Surapati Pramanik, Neutrosophic theory and applications have been expanding in all directions at an astonishing rate especially after the introduction of the journal entitled Neutrosophic Sets and Systems. New theories, techniques, algorithms have been rapidly developed. One of the most striking trends in the neutrosophic theory is the hybridization of neutrosophic set with other potential sets such as rough set, bipolar set, soft set, hesitant fuzzy set, etc.
