Software Metrics C. Ravindranath Pandian, 2003-09-26 The modern field of software metrics emerged from the computer modeling and statistical thinking services of the 1980s As the field evolved metrics programs were integrated with project management and metrics grew to be a major tool in the managerial decision making process of software companies Now practitioners in the software industry have *Simple Statistical Methods for Software Engineering* C. Ravindranath Pandian, Murali Kumar, 2015-05-21 Although there are countless books on statistics few are dedicated to the application of statistical methods to software engineering *Simple Statistical Methods for Software Engineering Data and Patterns* fills that void Instead of delving into overly complex statistics the book details simpler solutions that are just as effective and connect with *Automated Defect Prevention* Dorota Huizinga, Adam Kolawa, 2007-08-24 This book describes an approach to software management based on establishing an infrastructure that serves as the foundation for the project This infrastructure defines people roles necessary technology and interactions between people and technology This infrastructure automates repetitive tasks organizes project activities tracks project status and seamlessly collects project data to provide measures necessary for decision making Most importantly this infrastructure sustains and facilitates the improvement of human defined processes The methodology described in the book which is called Automated Defect Prevention ADP stands out from the current software landscape as a result of two unique features its comprehensive approach to defect prevention and its far reaching emphasis on automation ADP is a practical and thorough guide to implementing and managing software projects and processes It is a set of best practices for software management through process improvement which is achieved by the gradual automation of repetitive tasks supported and sustained by this flexible and adaptable infrastructure an infrastructure that essentially forms a software production line In defining the technology infrastructure ADP describes necessary features rather than specific tools thus remaining vendor neutral Only a basic subset of features that are essential for building an effective infrastructure has been selected Many existing commercial and non commercial tools support these as well as more advanced features Appendix E contains such a list **The Internet of Products** Robert Neumann, 2012-11-27 This study approaches the difficult problem of providing Internet users with a completely transparent view on electronic markets from a product information accessibility point of view Robert Neumann analyzes economic ecological and societal gains of openly accessible product information in the form of theoretical models Though many aspects of very different research disciplines have to be investigated to gain a holistic view on the Internet of Products this thesis reduces the range of involved research topics to product information discoverability related questions *Intelligent Interactive Assistance and Mobile Multimedia Computing* Djamshid Tavangarian, Thomas Kirste, Dirk Timmermann, Ulrike Lucke, Daniel Versick, 2009-10-28 This book constitutes the refereed papers of the International Conference on Intelligent Interactive Assistance and Mobile Multimedia Computing IMC 2009 which was held in Rostock Warnemünde Germany in November 2009 The 26 revised full papers
