Soil Sampling and Methods of Analysis M.R. Carter, E.G.

Gregorich, 2007-08-03 Thoroughly updated and revised this second edition of the bestselling *Soil Sampling and Methods of Analysis* presents several new chapters in the areas of biological and physical analysis and soil sampling. Reflecting the burgeoning interest in soil ecology, new contributions describe the growing number and assortment of new microbiological techniques described in depth, methods and demonstrate new tools that characterize the dynamics and chemistry of soil organic matter and soil testing for plant nutrients. A completely new section devoted to soil water reviews up to date field and laboratory based methods for saturated and unsaturated soil hydraulic properties. Retaining the easy to follow cookbook style of the original, this second edition provides a compilation of soil analytical techniques that are fast, straightforward and relatively easy to use. Heavily referenced, peer reviewed contributions from approximately 150 specialists make this a practical manual and resource handbook that describes a wide array of methods, both conventional and cutting edge, for analyzing the chemical, biological, biochemical and physical properties of many different soil types. Including several primer chapters that cover the overall principles and concepts behind the latest techniques, the book presents sufficient detail on the materials and procedures to characterize the potential and limitation of each method. It covers recent improvements in methodology, outlines current methods and characterizes the best methods available for selecting the appropriate analysis technique. Promoting the research and practical application of findings in soil science, *Soil Sampling and Methods of Analysis* Second Edition continues to be the most current, detailed, comprehensive tool for researchers and practitioners working with soil. *Response of Soil Mineral Weathering to Elevated Carbon Dioxide* Jennie Catherine Stephens, California Institute of Technology, Division of Engineering and Applied Science, 2002
