The "Summa Theologica: 1:1. QQ.I-XLVIII. Treatise on the last end. Treatise on human acts. 1. Of those which are proper to man. 2. Of the passions, which are acts common to man and other animals Saint Thomas (Aquinas),1915 *The "Summa Theologica" of St. Thomas Aquinas ...: qq. 49-89* Saint Thomas (Aquinas),1915 Consensus on Peirce's Concept of Habit Donna E. West,Myrdene Anderson,2016-09-12 This book constitutes the first treatment of C S Peirce s unique concept of habit Habit animated the pragmatists of the 19th and early 20th centuries who picked up the baton from classical scholars principally Aristotle Most prominent among the pragmatists thereafter is Charles Sanders Peirce In our vernacular habit connotes a pattern of conduct Nonetheless Peirce s concept transcends application to mere regularity or to human conduct it extends into natural and social phenomena making cohesive inner and outer worlds Chapters in this anthology define and amplify Peircean habit as such they highlight the dialectic between doubt and belief Doubt destabilizes habit leaving open the

possibility for new beliefs in the form of habit change and without habit change the regularity would fall short of habit conforming to automatic mechanistic systems This treatment of habit showcases how through human agency innovative regularities of behavior and thought advance the process of making the unconscious conscious The latter materializes when affordances invariant habits of physical phenomena form the basis for modifications in action schemas and modes of reasoning Further the book charts how indexical signs in language and action are pivotal in establishing attentional patterns and how these habits accommodate novel orientations within event templates It is intended for those interested in Peirce s metaphysic or semiotic including both senior scholars and students of philosophy and religion psychology sociology and anthropology as well as mathematics and the natural sciences *The Logic of Commands* Nicholas Rescher, 2019-11-04 Originally published in 1966 Professor Rescher s aim is to develop a logic of commands in exactly the same general way which standard logic has already developed a logic of truth functional statement compounds or a logic of quantifiers The object is to present a tolerably accurate and precise account of the logically relevant facets of a command to study the nature of inference in reasonings involving commands and above all to establish a viable concept of validity in command inference so that the logical relationships among commands can be studied with something of the rigour to which one is accustomed in other branches of logic *Annual Report of the Secretary of War* United States.
