Sir Raymond Unwin Architect Planner And Visionary:

Sir Raymond Unwin, Architect, Planner, and Visionary Frank Jackson, 1985 **Visionaries and Planners** Stanley Buder, 1990 In this book Stanley Buder examines the Garden City movement from its origins in mid nineteenth century England to its subsequent development and elaboration in twentieth century America The Garden City movement emphasized green belts around cities but was not identified exclusively with suburban development Much of the city planning which formed the basis for the Garden City movement was based upon designing the ideal community But this sense of idealism was soon lost with the transfer of the movement to America and indeed it was unable to sustain itself in the communities of its origin in England Raymond Unwin Mervyn Miller, 1992 Sir Raymond Unwin 1863 1940 was one of the best known pioneers of town planning Inspired by William Morris and Fabianism he designed new prototypes for working class housing The design of 20th century housing new suburbs and new towns perhaps owes more to Unwin and to the works in Letchworth New Earswick and Hampstead Garden Suburb than to any other individual **Artisans and Architects** Mark Swenarton, 1988-12-19 **Urban Theory and the Urban Experience** Simon Parker, 2015-04-24 Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies and the often unacknowledged debt that empirical and theoretical perspectives on the city owe one another From the foundations of modern urban theory in the work of Weber Simmel Benjamin and Lefebvre to the writings of contemporary urban theorists such as David Harvey and Manuel Castells and the Los Angeles school of urbanism Urban Theory and the Urban Experience traces the key developments in the idea of the city over more than a century Individual chapters explore investigative studies of the great metropolis from Charles Booth to the contemporary urban research of William J Wilson along with alternative approaches to the industrial city ranging from the Garden City Movement to the new urbanism The volume also considers the impact of new information and communication technologies and the growing trend towards disaggregated urban networks all of which raise important questions about viability and physical and social identity of the conventional townscape Urban Theory and the Urban Experience concludes with a rallying cry for a more holistic and integrated approach to the urban question in theory and in practice if the rich potent For the benefit of students and tutors frequent question points encourage exploration of key themes and annotated further readings provide follow up sources for the issues raised in each chapter The book will be of interest to students scholars practitioners and all those who wish to learn more about why the urban has become the dominant social economic and cultural form of the twenty first century

Food and Urbanism Susan Parham, 2015-02-26 Cities are home to over fifty percent of the world's population a figure which is expected to increase enormously by 2050 Despite the growing demand on urban resources and infrastructure food is still often overlooked as a key factor in planning and designing cities Without incorporating food into the design process how it is grown transported and bought cooked eaten and disposed of it is impossible to create truly resilient and convivial

urbanism Moving from the table and home garden to the town city and suburbs Food and Urbanism explores the connections between food and place in past and present design practices The book also looks to future methods for extending the gastronomic possibilities of urban space Supported by examples from places across the world including the UK Norway Germany France Spain Portugal Greece Romania Australia and the USA the book offers insights into how the interplay of physical design and socio spatial practices centred around food can help to maintain socially rich productive and sustainable urban space Susan Parham brings together the latest research from a number of disciplines urban planning food studies sociology geography and design with her own fieldwork on a range of foodscapes to highlight the fundamental role food has to play in shaping the urban future

The Common Good and the Global Emergency T. J. Gorringer, 2011-02-03 Provides a theoretical and political framework of the common good and applies this to the built environment

The Architecture of Edwin Maxwell Fry and Jane Drew Iain Jackson, Jessica Holland, 2016-03-16 Maxwell Fry and Jane Drew were pioneers of Modern Architecture in Britain and its former colonies from the late 1920s through to the early 1970s As a barometer of twentieth century architecture their work traces the major cultural developments of that century from the development of modernism its spread into the late colonial arena and finally to its re evaluation that resulted in a more expressive formalist approach in the post war era This book thoroughly examines Fry and Drew s highly influential Tropical Architecture in West Africa and India whilst also discussing their British work such as their post World War II projects for the Festival of Britain Harlow New Town Pilkington Brothers Headquarters and Cochurch Crematorium It highlights the collaborative nature of Fry and Drew s work including schemes undertaken with Elizabeth Denby Walter Gropius Denys Lasdun Pierre Jeanneret and Le Corbusier Positioning their architecture writing and educational endeavours within a wider context this book illustrates the significant artistic and cultural contributions made by Fry and Drew throughout their lengthy careers

The working class in mid-twentieth-century England Ben Jones, 2018-09-30 This book maps how working class life was transformed in England in the middle years of the twentieth century National trends in employment welfare and living standards are illuminated via a focus on Brighton providing valuable new perspectives of class and community formation Based on fresh archival research life histories and contemporary social surveys the book historicises important cultural and community studies which moulded popular perceptions of class and social change in the post war period It shows how council housing slum clearance and demographic trends impacted on working class families and communities While suburbanisation transformed home life leisure and patterns of association there were important continuities in terms of material poverty social networks and cultural practices This book will be essential reading for academics and students researching modern and contemporary social and cultural history sociology cultural studies and human geography

Here Comes the Sun Ken Worpole, 2000-12 Here Comes the Sun looks at how social reformers planners and architects in the early twentieth century tried to remake the city in the image of a sunlit ordered utopia While much has been written about architectural modernism

Worpole concentrates less on buildings and more on the planning of the spaces in between the parks public squares open air museums promenades public pools and other public leisure facilities Life in the open was of particular concern to early urban planners and reformers with their dreams of release from the confines of overcrowded unsanitary slums Picturing youthful working class bodies made healthy by exercise and tanned by the sun they imagined an escape route from cities Worpole demonstrates how open air public spaces became sought after commissions for many early modernist architects in the early 1900s resulting in the transformation of the European cityscape a fascinating account of the political idealism that informed urban planning for the first two thirds of the twentieth century full of insights into how public space influences a sense of belonging and ownership The Guardian This is one of those books you stroke lovingly Open it and there is page after page of beautiful photographs this book combines history society politics environment and place in a well written and emotive text The strength of the book is the way it crosses these traditional boundaries and disciplines Town and Country Planning Drawing on architectural theories philosophy literature and even film making Worpole s book is wide ranging and erudite and should be of interest to the layperson as well as to the urban planner It is also elegantly written and complemented by a mixture of black and white and colour photographs to provide a visual emphasis to the points he raises N16 Magazine
