The Sacred and its Scholars Idinopulos, Yonan, 1996-10-01 This volume of essays is devoted to a careful examination of the importance of methodology in the study of primary religious data. The essays focus on the Sacred as an ultimate object of descriptive analysis and critical scrutiny on the part of a select number of North American and European methodologists in the study and teaching of the history of religions and its allied disciplines. The central question to which the contributors respond are these: What is the Sacred? Is it a being or a concept of a being? Is it a mental state or an objective reality or something else entirely? Can the Sacred be described as an empirical fact or as a formal rule for religious inquiry? If the Sacred is a valid category in the study and teaching of religion, then what can be said about the antithesis of the sacred, namely the profane or the secular? This volume probes these questions with great care in order to justify a number of ways the Sacred can be construed as an indispensable notion for the study and teaching of religion.

The Sacred Network Chris H. Hardy, 2011-02-23 How sacred sites amplify the energies of consciousness, the earth, and the universe. Examines the web of geometrical patterns linking sacred sites worldwide with special focus on the sacred network of ley lines in Paris. Unveils the coming state of shared consciousness for humanity fueled by the sacred network. Reveals how consciousness is a tangible form of energy. First marked by the standing stones of our megalithic ancestors, the world's sacred sites are not only places of spiritual energy but also hubs of cosmic energy and earthly energy. Generation upon generation has recognized the power of these sites with the result that each dominant culture builds their religious structures on the same spots. The Cathedral of Notre Dame in Paris, for example, was constructed over a Temple to Diana that in turn had been built over a stone pillar worshipped by the Gauls. In *The Sacred Network*, Chris Hardy shows how the world's sacred sites coincide with the intersections of energetic waves from the earth's geomagnetic field and how, via their megaliths, temples, and steeples, these sites act as antennae for the energies of the cosmos. Delving deeply into Paris's sacred network, she also explores the intricate geometrical patterns created by the alignments of churches and monuments such as pentagrams and Stars of David. Revealing that consciousness is a tangible energy, she explains how the sacred network is fueling an 8,000-year evolutionary cycle initiated by our megalithic ancestors that will soon culminate in a new state of shared consciousness for humanity.

Sleep Monsters and Superheroes Clare R. Johnson, Jean M. Campbell, 2016-09-26 World renowned contributors across several disciplines reveal how dreams can aid and empower children in daily life. Children can feel powerless in waking life, a fact that is often reflected in their dreams. This book shows how to take an active role in guiding children's dreams to help grow their confidence and improve their coping skills for real life difficulties. Contributors from across various fields provide simple techniques to help children utilize dreamwork as a conduit for creative discovery and empowerment. Each chapter includes case studies and methods for working in practical ways with children, explaining what may trigger nightmares for children and how monster dreams can be guided to become superhero dreams. Essays encompass a spectrum of children's dreams, with experts discussing dreams of trauma, dreams as a

deepening polarization in the United States *Flyover Fictions* is an exploration of the trope's current politicization historical contexts and general proliferation of meanings Instead of resolving the ambiguities inherent in the concept the volume considers what can be done with these ambiguities and how precisely their fuzziness might be used to create an analytic tool to describe understand and critique processes of cultural hierarchization The contributors show how flyover fictions may operate in different national contexts and also internationally or transnationally not only providing a fresh perspective on historical and contemporary American culture but also supplying a conceptual toolbox for broader use

Jewish Studies at the Crossroads of Anthropology and History Ra'anana S. Boustan, Oren Kosansky, Marina Rustow, 2011-01-24 Over the past several decades the field of Jewish studies has expanded to encompass an unprecedented range of research topics historical periods geographic regions and analytical approaches Yet there have been few systematic efforts to trace these developments to consider their implications and to generate new concepts appropriate to a more inclusive view of Jewish culture and society *Jewish Studies at the Crossroads of Anthropology and History* brings together scholars in anthropology history religious studies comparative literature and other fields to chart new directions in Jewish studies across the disciplines This groundbreaking volume explores forms of Jewish experience that span the period from antiquity to the present and encompass a wide range of textual ritual spatial and visual materials The essays give full consideration to non written expressions of ritual performance artistic production spoken narrative and social experience through which Jewish life emerges More than simply contributing to an appreciation of Jewish diversity the contributors devote their attention to three key concepts authority diaspora and tradition that have long been central to the study of Jews and Judaism Moving beyond inherited approaches and conventional academic boundaries the volume reconsiders these core concepts reorienting our understanding of the dynamic relationships between text and practice and continuity and change in Jewish contexts More broadly this volume furthers conversation across the disciplines by using Judaic studies to provoke inquiry into theoretical problems in a range of other areas

Machine Dreaming and Consciousness J. F. Pagel, Philip Kirshtein, 2017-04-13 *Machine Dreaming and Consciousness* is the first book to discuss the questions raised by the advent of machine dreaming Artificial intelligence AI systems meeting criteria of primary and self reflexive consciousness are often utilized to extend the human interface creating waking experiences that resemble the human dream Surprisingly AI systems also easily meet all human based operational criteria for dreaming These dreams are far different from anthropomorphic dreaming including such processes as fuzzy logic liquid illogic and integration instability all processes that may be necessary in both biologic and artificial systems to extend creative capacity Today multi linear AI systems are being built to resemble the structural framework of the human central nervous system The creation of the biologic framework of dreaming emotions associative memories and visual imagery is well within our technical capacity AI dreams potentially portend the further development of consciousness in these systems This focus on AI dreaming raises even larger questions In many ways dreaming defines our

humanity What is humanly special about the states of dreaming And what are we losing when we limit our focus to its technical and biologic structure and extend the capacity for dreaming into our artificial creations Machine Dreaming and Consciousness provides thorough discussion of these issues for neuroscientists and other researchers investigating consciousness and cognition Addresses the function and role of dream like processing in AI systems Describes the functions of dreaming in the creative process of both humans and machines Presents an alternative approach to the philosophy of machine consciousness Provides thorough discussion of machine dreaming and consciousness for neuroscientists and other researchers investigating consciousness and cognition **Library of Congress Subject Headings** Library of Congress,Library of Congress.
