Six Billion Plus Population Issues In The Twenty First Century:

Six Billion Plus K. Bruce Newbold, 2007 This balanced text offers a concise and readable introduction to world population growth and its implications for the future With a population currently exceeding six billion and expected to reach ten billion by mid century the globe faces a demographic situation that is now more critical than ever before While the developed world grapples with the problems of an aging and declining population the developing world will contend with the opposite dilemma of explosive growth And so the strongest factors shaping the global environment in the decades to come will include population fertility the social and economic impact of the HIV AIDS epidemic legal and illegal immigration and refugees The implications are enormous as population growth exacerbates food and resource scarcities places pressure on institutions and promotes the potential for conflict Drawing on a geographical perspective and using examples from around the world this fully updated edition will be an invaluable resource for all readers concerned with the intertwined issues of population environment and health

The State of the Earth Paul K. Conkin, 2006-12-15 An assessment of where we are where we re headed and what we need to do before it s too late Instructive well researched and easy to read John T Ackerman Strategic Studies Quarterly This era of staggering scientific and technological innovations with major changes in agriculture manufacturing commerce and communications seems to document unparalleled human achievement Yet when we examine the long term implications it becomes clear that the delicate environmental balance that sustains life on this planet is under serious threat and the past century may be remembered not as a period of great progress but as one marked by unrestrained consumption and failure to come close to a sustainable use of the earth s limited natural resources In The State of the Earth noted historian Paul K Conkin provides a comprehensive analysis of the many environmental hazards that humans must face in this still young century Our activities have threatened the survival of many plants and animals created scarcities in cultivatable soils and water needed for irrigation used up a large share of fossil fuels polluted air and water and most likely created conditions that will lead to devastating climate changes This is an invaluable resource for those who desire a broad yet thorough and scientifically informed introduction to present environmental challenges

Geographical Gerontology Mark W. Skinner, Gavin J. Andrews, Malcolm P. Cutchin, 2017-11-27 Understanding where ageing occurs how it is experienced by different people in different places and in what ways it is transforming our communities economies and societies at all levels has become crucial for the development of informed

research policy and programmes This book focuses on the interdisciplinary field of study geographical gerontology that addresses these issues With contributions from more than 30 leading geographers and gerontologists the book examines the scope and depth of geographical perspectives concepts and approaches applied to the study of ageing old age and older populations The book features 25 chapters organized into five parts that cover the field s theoretical traditions and intellectual evolution the contributions of key disciplinary perspectives from population geography social and cultural geography health geography urban planning and environmental studies the scales of inquiry within geographical gerontology from the global to the embodied the thematic breadth of contemporary issues of interest that define the field places spaces and landscapes of ageing and a discussion about challenges opportunities and agendas for future developments in geography and gerontology This book provides the first comprehensive foundation of knowledge about the state of the art of geographical gerontology that will be of interest to scholars of ageing around the world *Globalisation and Sustainable Development* Vladimir F. Krapivin, 2007-07-05 A characteristic of the present global ecological situation is increasing instability or put another way a crisis in the civilization system the global scale of which is expressed through a deterioration of human and animal habitats The most substantial features of global ecodynamics of the late 20th and early 21st centuries include the rapid increase in world population mainly in developing countries increase in the size of the urban population considerable growth in the number of megalopolises and increase in the scales of such dangerous diseases as HIV AIDS hepatitis tuberculosis etc With growing population size the problems of providing people with food and improving their living conditions in many regions will not only not be resolved but will become even more urgent Any possible benefit from decrease in per capita consumption as a result of increased efficiency of technologies will be outweighed by the impact of such a growth in population size Despite the predominant increase of population in developing countries their contribution to the impact on the environment will not necessarily exceed that of developed countries Key to ensuring sustainable development of the nature society system NSS is the relationship between production and consumption as mentioned at the World Summit on Sustainable Development in Johannesburg 2002 As civilization has developed so the problem of predicting the scale of expected climate change and associated change in human habitats has become more urgent *Popular Culture, Geopolitics, and Identity* Jason Dittmer, Daniel Bos, 2019-03-19 Now in a thoroughly revised edition this innovative and engaging text surveys the field of popular geopolitics exploring the relationship between popular culture and international relations from a geographical perspective Jason Dittmer and Daniel Bos connect global issues with the questions of identity and subjectivity that we feel as individuals arguing that who we think we are influences how we understand the world Building on the strengths of the first edition each chapter focuses on a specific theme such as representation audience and affect by explaining the concept and then outlining some of the emerging debates that have revolved around it New and updated case studies including heritage and social media help illustrate the significance of the concepts and capture the

ways popular culture shapes our understandings of geopolitics within everyday life Students will enjoy the text s accessibility and colorful examples and instructors will appreciate the way the book brings together a diverse multidisciplinary literature and makes it understandable and relevant **Bordering and Ordering the Twenty-first Century** Gabriel Popescu,2012 This timely book introduces readers to the central question of borders in the twenty first century After familiarizing readers with border thinking and making from antiquity to the present Gabriel Popescu turns a critical eye on current concepts processes and contexts Assessing the latest theoretical approaches to border studies the author deftly incorporates a range of disciplinary perspectives including geography international relations sociology history security studies and anthropology He explores recent world events discussing how current issues such as migration terrorism global warming pandemics the international human rights regime outsourcing the economic crisis supranational integration regionalization and digital technology relate to borders and influence our lives Written with a clear eye and voice this book makes a complex subject accessible to a wide readership Environmental Change and Security Project Report ,2003 *World History Encyclopedia [21 volumes]* Alfred J. Andrea Ph.D.,2011-03-23 An unprecedented undertaking by academics reflecting an extraordinary vision of world history this landmark multivolume encyclopedia focuses on specific themes of human development across cultures era by era providing the most in depth expansive presentation available of the development of humanity from a global perspective Well known and widely respected historians worked together to create and guide the project in order to offer the most up to date visions available A monumental undertaking A stunning academic achievement ABC CLIO s World History Encyclopedia is the first comprehensive work to take a large scale thematic look at the human species worldwide Comprised of 21 volumes covering 9 eras an introductory volume and an index it charts the extraordinary journey of humankind revealing crucial connections among civilizations in different regions through the ages Within each era the encyclopedia highlights pivotal interactions and exchanges among cultures within eight broad thematic categories population and environment society and culture migration and travel politics and statecraft economics and trade conflict and cooperation thought and religion science and technology Aligned to national history standards and packed with images primary resources current citations and extensive teaching and learning support the World History Encyclopedia gives students educators researchers and interested general readers a means of navigating the broad sweep of history unlike any ever published Social Science Elgin F.
