E. H. Mellor, 2021-05-11 Originally published in 1983 this volume examines one of the most long standing major commercial water arteries of Western and Central Europe The Rhine Since the mid 20th Century its importance has been given new stimulus by the intensified mobility of economic circulation generated by the EU forming as it does a common axis to that organisation s original six members The Rhine is one of the world s busiest rivers and therefore provides an excellent case study in the development of inland waterway transport not only because of its complex physical nature but also because of the diversity of economic social and political patterns along its course **Writers Directory NA** NA, 2016-03-05 **Who's who** , 1975

was commercial in economics liberal in politics and parochial in policy somnambulant in an era of salutary neglect but Stephen Saunders Webb here demonstrates that the American provinces under the spur of war became capitalist coercive and aggressive owing to the vigorous leadership of career army officers trained and nominated to American government by the captain general of the allied armies the first duke of Marlborough and that his influence and that of his legates prevailed through the entire century in America Webb s work follows the duke whom an eloquent enemy described as the greatest statesman and the greatest general that this country or any other country has produced his staff and soldiers through the ten campaigns which by defanging France made the union with Scotland possible and made Great Britain preeminent in the Atlantic world Then Webb demonstrates that the duke s legates transformed American colonies into provinces of empire Marlborough s America fifty years in the making is the fourth volume of The Governors General
