*Handbook of Teaching and Learning Persian as a Second Language* Hooman Saeli, 2025-09-26 This collection explores relevant pedagogical and sociolinguistic topics in the teaching and learning of Persian as a foreign and second language Owing to the dearth of research in many areas pertaining to the teaching and learning of Persian this handbook provides empirically supported insights into various aspects of these areas While the literature on teaching and learning Persian is growing the field lacks a cohesive collection on Persian as a foreign second language The book addresses issues pertaining to the standardization and validation of teaching and assessment methods which remain under explored in the contexts of teaching and learning Persian It also covers the teaching of Persian

pragmatics the use of corpora as well as a range of different areas within linguistics including phonetics prosody and historical linguistics This comprehensive collection contributes substantially to the scientific study of many aspects of teaching and learning Persian which have been neglected for decades A must have text in Persian language pedagogy and Persian sociolinguistics it an essential book for those in teaching and learning in Persian language programs worldwide

Structronic Systems: Smart Structures, Devices And Systems (In 2 Parts) Ardeshtir Guran,Horn-sen Tzou,Gary L Anderson,Michihiro Natori,Ulrich Gabbert,Junji Tani,Elmar Breitbach,1998-04-04 This book is concerned with electrostructural systems particularly the interaction between the control of the structural and electrical electronic components Structronics is a new emerging area with many potential applications in the design of high performance structures adaptive structures high precision systems and micro systems As structures are increasingly being controlled by electronics the problems of structural engineering can be separated less and less from those of electronic engineering and control engineering This graduate level book fills a gap in the literature by considering these problems while giving an overview of the current state of analysis modelling and control for structronic systems It is a coherent compendium written by leading experts in this new research area and gives readers a sophisticated toolbox that will allow them to tackle the modelling and control of smart structures The inclusion of an extensive up to date bibliography and index makes this volume an invaluable standard for professional reference Because of the large number of contributions to the present volume it has been subdivided into two parts of which this is Part I This book will be of interest to engineers materials scientists physicists and applied mathematicians The synergistic integration of active smart materials structures sensors actuators and control electronics has redefined the concept of structures from a conventional passive elastic system to an active life like structronic structure electronic system with inherent self sensing diagnosis and control capabilities Because of its multi disciplinary nature the development of structronic systems has attracted researchers and scientists from many disciplines such as structures materials control electronics mathematics manufacturing electromechanics and mechanics In practical applications this new structronic system can be used as a component of high performance machines or structural systems or be an integrated structure itself performing designated function s Most common active smart materials such as piezoelectrics shape memory alloys electro and magneto strictive materials and polyelectrolyte gels have been reviewed in Part I Application examples are also provided and research issues reported on While the first part focuses primarily on materials and structures Part II emphasizes control applications and intelligent systems With the information provided in this two volume book scientists and researchers can easily grasp the state of the art of smart materials and structronic systems and are ready to pursue their own research and development endeavors *Management, Tourism and Smart Technologies* Carlos Montenegro,Álvaro Rocha,Juan Manuel Cueva Lovelle,2024-01-03 This book presents advances in the research of various entities in the world which are working on the application of technology or management in tourism Indeed one of the

sectors hardest hit by the pandemic was tourism likewise one of the post pandemic effects is the rapid recovery of the sector but more importantly is the great innovation that has occurred in marketing strategies for tourism using technology and applying management strategies not only to be more profitable but to have the best customer satisfaction The book is aimed at the general public that seeks to innovate learn from lessons learned and establish a knowledge base in mechanisms that apply technology or management in tourism with the aim of improving the experience of all those involved in the business chain This compendium aims to share all those great experiences and researches in the areas of Managements Tourism Marketing strategies in Management Tourism and Technology Technology Applied Computer Science Artificial Intelligence Business Administration Cloud Computing Educational Management Finance Insurance and Services Management Health Tourism Human Resource Management Information Systems Planning and Management Information Technologies in Tourism Internet Technology Knowledge Management Management of Supply Chain and Logistics Marketing Innovation Robotics Strategic Management Innovation Sustainability Management Technical Economy Management Technical Innovation and Management Technology in Tourism and Tourist Experience Tourism Industry and Ecology Tourism Management a total of 77 research projects and many spaces and relationships between researchers to collaborate in the advancement of science are presented

Hall, 2025-04 The Concerns Based Adoption Model CBAM edited by Gene E Hall a key originator of CBAM uses a research tested model to introduce students in education to ways of thinking strategies and steps that leaders can take to facilitate and advance change processes in their own schools     Mobility for Smart Cities and Regional Development - Challenges for Higher Education Michael E. Auer, Hanno Hortsch, Oliver Michler, Thomas Köhler, 2022-01-28 This book presents recent research on interactive collaborative learning We are currently witnessing a significant transformation in the development of education and especially post secondary education To face these challenges higher education has to find innovative ways to quickly respond to these new needs On the one hand there is a pressure by the new situation in regard to the COVID pandemic On the other hand the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months Scientifically based statements as well as excellent experiences best practice are absolutely necessary These were the aims connected with the 24th International Conference on Interactive Collaborative Learning ICL2021 which was held online by Technische Universität Dresden Germany on 22 24 September 2021 Since its beginning in 1998 this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy In this way we try to bridge the gap between pure scientific research and the everyday work of educators This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education Interested readership includes policymakers academics educators researchers in pedagogy and learning theory schoolteachers learning industry further and continuing education lecturers etc     *Resources in Education* , 2001-04     Innovations in online teaching and learning Judah P. Makonye, Nokulunga S. Ndlovu, 2023-03-01 This book's research is on online pedagogical approaches devised by teacher educators and researchers to circumvent a face to face curriculum delivery during the COVID 19 pandemic The challenge faced by educators was that they were uncertain of how to use digital technologies in teaching learning and assessment productively This book reports on case studies on teaching student teachers with technology in a way that

advanced not only communication but also the cognitive growth of students in relation to disciplinary knowledge. The scholars from South African universities used both conceptual and empirical methodologies mostly in qualitative set ups. The scholarly contributions in this book are varied. They cover theoretical nuances for ICT use in education, considerations for the use of computers in the classroom, pedagogical thinking and pedagogical integration of ICTs in education, affordances of iPads in visible teaching and learning, supporting student cognition in Languages, Mathematics, Science, Engineering, Graphics and Design with ICTs. The use of software applications such as GeoGebra and Excel in teaching and learning mathematics is researched among others. The rich discussions that emerged from their research enable academics to learn from others' innovative moments that came as a result of pandemic pressure. The recommendations in this book can be used in blended learning beyond the COVID 19 era as curriculum delivery methods are bound to change. The value of this book is that it reports on pedagogical innovations in using digital technologies in teacher education. Researchers have an opportunity to learn from this book how to deal with the tantalising teaching and learning problem of our time. How can the use of digital technology transform teaching and learning in general and teacher education in particular?

Motivation, Autonomy and Emotions in Foreign Language Learning Kata Csizér, Dávid Smid, Anna Zólyomi, Ágnes Albert, 2024-11-12. This book highlights the roles of several individual difference (ID) variables on the language learning process, exploring them from both the students and the teachers' perspectives. It presents the results of a large scale mixed methods investigation which was conducted with secondary school pupils and their teachers in Hungary. The quantitative questionnaire data is used to analyze the English language learners' motivation, autonomy and self efficacy beliefs and to examine the relationships between these and a wide range of positive and negative emotions. The qualitative data, consisting of interviews with teachers, gives voice not only to an understanding of student related ID variables but also to teachers' reflections on their own cognitive, affective and behavioral processes. Taken together, the contrastive analysis of these two datasets yields interactional results that provide fresh insights into the language learning process and practical classroom applications.
