The Harmony Of The Human Body Musical Principles In Human Physiology:

The Harmony of the Human Body Armin Johannes Husemann, 1994 Husemann applies musical principles as a method of gaining insight into the structure of the human body and the forces that work upon it. He seeks to utilize our experience of music to explain the physiological and anatomical relationships in the body and to illuminate the spiritual influences that determine physical development. Drawing on artistic exercises set out by Rudolf Steiner to develop a better understanding of these influences, the book explores the cosmic origins of human beings and the evolutionary laws that govern their development.

The Essentials of Education Rudolf Steiner, 1998-02 5 lectures Stuttgart April 8 11 1924 CW 308 These talks were given during an educational conference in 1924. They are the last public lectures given by Rudolf Steiner in Germany. According to one member of his audience, Seventeen hundred people listened to him; the prolonged applause from this great crowd at the end of every lecture was deeply moving, while at the end of the last lecture the applause became an ovation that seemed as if it would never end. This kind of adoration was the result not only of who Steiner was as an individual but of what he accomplished as well. People had already begun to realize the potential and the promise for the future that Waldorf education held out to the children of the world. The Essentials of Education together with its companion book The Roots of Education present a remarkable synthesis of what Waldorf education is and what it can become. The Waldorf experiment had matured for five years since 1919 when Steiner helped to establish the first Waldorf school. He had guided that school from its beginning, observing very closely all that happened. As a result, he was able to distill and present the essentials of Waldorf education with elegance as well as with the urgency he felt for the coming times. Art as Spiritual Activity Rudolf Steiner, 1997 This book introduces a new way for thinking about creating and viewing art. Rudolf Steiner saw his task as the renewal of the lost unity of science, the arts, and religion; thus he created a new cognitive, scientific, and religious art in anthroposophy. The implications of his act, recognized by such diverse artists as Wassily Kandinsky and Joseph Beuys, are only now coming fully to light. In his thorough introduction of more than a hundred pages, Michael Howard takes readers through these thought-provoking chapters: Is Art Dead? To Muse or Amuse? Artistic Activity As Spiritual Activity. The Representative of Humanity. Beauty, Creativity, and Metamorphosis. New Directions in Art. Lectures include: The Aesthetics of Goethe's Worldview. The Spiritual Being of Art. Buildings Will Speak. The Sense Organs and Aesthetic Experience. The Two Sources of Art. The Building at Dornach. The Supersensible Origin of the Arts. Truth, Beauty, and Goodness. Christ, Ahriman, and Lucifer. Plus a bibliography and index.

Sacred Space, Sacred Sound Susan Elizabeth Hale, 2013-11-01 Visionary singer Susan Hale believes that early peoples deliberately built their structures to enhance natural vibrations. She takes us around the globe from Stonehenge and New Grange to Gothic cathedrals and Tibetan stupas in New Mexico to explore the acoustics of sacred places. But she says you don't have to go to the Taj Mahal. The sacred is all
