The Hell That Is Ice James Markert, 1998-07 *Fire Beneath the Ice* Helen Brooks, 2011-07-15 He wanted passion not commitment Lydia's new boss was a powerfully charismatic man But Lydia dared not surrender to the dangerously sweet attraction she felt toward Wolf Strade He might be icy cool on the outside but he was all fire and passion underneath just a little too hot to handle And Wolf made it clear that love and marriage didn't feature on his agenda whereas Lydia had her tiny daughter Hannah to think of But still she couldn't get Wolf out of her mind Should she try and melt the icy barrier around Wolf's heart and if so how Helen Brooks pens a superb story with rich characters sparkling interplay and a riveting emotional conflict Romantic Times *The Telescope in the Ice* Mark Bowen, 2017-11-14 IceCube Observatory a South Pole instrument making the first actual observations of high energy neutrinos has been called the weirdest of the seven wonders of modern astronomy by Scientific American In *The Telescope in the Ice* Mark Bowen tells the amazing story of the people who built the instrument and the science involved Located near the U S Amundsen Scott Research Station at the geographic South Pole IceCube is unlike most telescopes in that it is not designed to detect light It employs a cubic kilometer of diamond clear ice more than a mile beneath the surface to detect an elementary particle known as the neutrino In 2010 it detected the first extraterrestrial high energy neutrinos and thus gave birth to a new field of astronomy IceCube is also the largest particle physics detector ever built Its scientific goals span not only astrophysics and cosmology but also pure particle physics And since the neutrino is one of the strangest and least understood of the known elementary particles this is fertile ground Neutrino physics is perhaps the most active field in particle physics today and IceCube is at the forefront *The Telescope in the Ice* is ultimately a book about people and the thrill of the chase the struggle to understand the neutrino and the pioneers and inventors of neutrino astronomy ***The Girl with Ice in Her Veins*** Karin Smirnoff, 2025-09-02 Lisbeth Salander is back and maybe better than ever Lee Child Fresh fearless One of the great crime series of our time could not be in safer more capable hands Chris Whitaker INTERNATIONAL BESTSELLER Lisbeth Salander returns in this chilling new installment of the multi million copy bestselling Millennium series Sweden's far north is growing colder even in springtime the town of Gasskas is buried under a relentless snow As temperatures drop tensions rise between a global corporation shamelessly exploiting the area's natural resources and wary locals who have scores to settle A bomb blasts apart a crucial bridge Soon after a young journalist is found murdered Meanwhile Lisbeth is at home in Stockholm looking to fill the void her last lover left behind When she discovers that fellow hacker Plague has been kidnapped and taken up north and finds her niece Svala on her doorstep she has no choice but to return to Gasskas with Mikael Blomkvist at her side Blomkvist takes the helm at Gasskas's newspaper and Lisbeth tries to locate Plague But then Svala goes missing and Lisbeth's worst fears come to haunt her Lured back to a lawless town full of predators disguised as saviors and foes disguised as friends forced to face down their own troubling pasts and those of their loved ones Salander and Blomkvist must untangle a history of violence before it's too
