The Social Condition and Education of the People in England and Europe Joseph Kay,1850 The Social Condition and Education of the People in England Joseph Kay,1863 **The Social Condition and Education of the People in England and Europe: The education of the people** Joseph Kay,1973 **The Social Condition of Deaf People** Sara Trovato,Anna Folchi,2022-05-09 This book is about the social condition of Deaf people told through a Deaf woman s autobiography and a series of essays investigating how hearing societies relate to Deaf people Michel Foucault described the powerful one as the beholder who is not seen This is why a Deaf woman s perspective is important Minorities that we don t even suspect we have power over observe us in turn Majorities exert power over minorities by influencing the environment and institutions that simplify or hinder lives language mindsets representations norms the use of professional power Based on data collected by Eurostat this volume provides the first discussion of statistics on the condition of Deaf people in a series of European countries concerning education labor gender This creates a new opportunity to discuss inequalities on the basis of data The case studies in this volume reconstruct untold moments of great advancement in Deaf history successful didactics supporting bilingualism the reasons why Deaf empowerment for and by Deaf people does and does not succeed A work of empowerment is effective if it acts on a double level the community to be empowered and society at large resulting in a transformation of society as a whole This book provides instruments to work towards such a transformation **Incarcerated Young People, Education and Social Justice** Kitty te Riele,Tim Corcoran,Fiona MacDonald,Alison Baker,Julie White,2023-03-31 This book foregrounds the provision of education for young people who have been remanded or sentenced into custody Both international conventions and national legislation and guidelines in many countries point to the right of children and young people to access education while they are incarcerated Moreover education is often seen as an important protective and rehabilitative factor However the conditions associated with incarceration generate particular challenges for enabling participation in education Bridging the fields of education and youth justice this book offers a social justice analysis through the lens of participatory parity the book brings together rare interviews with staff and young people in youth justice settings in Australia secondary data from these sites a suite of pertinent and frank reports and international scholarship Drawing on this rich set of material the book demonstrates not only the challenges but also the possibilities for education as a conduit for social justice in custodial youth justice The book will be of immediate relevance to governments and youth justice staff for meaningfully meeting their obligation of enabling children and young people in custody to benefit from education and of interest to scholars and researchers in education youth work and criminology **Education, Social Status, and Health** John Mirowsky,2017-09-08 Education forms a unique dimension of social status with qualities that make it especially important to health It influences health in ways that are varied present at all stages of adult life cumulative self amplifying and uniformly positive Educational attainment marks social status at the

beginning of adulthood functioning as the main bridge between the status of one generation and the next and also as the main avenue of upward mobility It precedes the other acquired social statuses and substantially influences them including occupational status earnings and personal and household income and wealth Education creates desirable outcomes because it trains individuals to acquire evaluate and use information It teaches individuals to tap the power of knowledge Education develops the learned effectiveness that enables self direction toward any and all values sought including health For decades American health sciences has acted as if social status had little bearing on health The ascendance of clinical medicine within a culture of individualism probably accounts for that omission But research on chronic diseases over the last half of the twentieth century forced science to think differently about the causes of disease Despite the institutional and cultural forces focusing medical research on distinctive proximate causes of specific diseases researchers were forced to look over their shoulders back toward more distant causes of many diseases Some fully turned their orientation toward the social status of health looking for the origins of that cascade of disease and disability flowing daily through clinics Why is it that people with higher socioeconomic status have better health than lower status individuals The authors who are well recognized for their strength in survey research on a broad national scale draw on findings and ideas from many sciences including demography economics social psychology and the health sciences People who are well educated feel in control of their lives which encourages and enables a healthy lifestyle In addition learned effectiveness a practical end of that education enables them to find work that is autonomous and creative thereby promoting good health

Young people, education, and sustainable development Peter Blaze

Corcoran,Philip M. Osano,2023-09-04 Young people have an enormous stake in the present and future state of Earth Almost half of the human population is under the age of 25 If young people s resources of energy time and knowledge are misdirected towards violence terrorism socially isolating technologies and unsustainable consumption civilization risks destabilization Yet there is a powerful opportunity for society if young people can participate positively in all aspects of sustainable development In order to do so young people need education political support resources skills and hope This volume offers a global perspective on education initiatives by and for young people that promote a transition to sustainability

It includes 38 essays co authored by 68 contributors from 25 nations representing a diversity of geography gender and generation The development of youth leadership has been a central concern of my professional work Young people have a lot to offer to sustainable development and should participate in planning for our planet s future This rich collection of theoretical and practical approaches captures the growing response of young people to this challenge I am particularly pleased with the attention paid to the role of often underrepresented regions of the world to the role of women and to the Earth Charter in the creating of a peaceful and sustainable future Julia Marton Lef vre Director General of IUCN International Union for Conservation of Nature and former Rector of the University for Peace This book is a rich global tapestry depicting the inter linkages among youth education and sustainable development What is particularly interesting is that it shows how education at all levels can be a powerful engine for promoting sustainability This work is an important contribution to the United Nations Decade of Education for Sustainable Development Goolam Mohamedbhai Secretary General Association of African Universities and Past President International Association of Universities This important and skillfully prepared book comes at a critical time A great strength of this volume is that it blends together theoretical and practical insights regarding education for sustainable development by and for young people It is written from diverse cultural perspectives from all world regions Readers from many fields especially young people and their teachers will find it timely and relevant I hope that it will inspire the younger generation to get involved in seeking solutions to the challenges we face James Gustave Speth Former Administrator of the United Nations Development Programme and Dean Emeritus of the School of Forestry and Environmental Studies at Yale University It is my hope that you are inspired as I have been by Young People Education and Sustainable Development Exploring Principles Perspectives and Praxis for the stories in this volume are full of the possibilities that emerge when we honor and support young people Ruud Lubbers Former Prime Minister of The Netherlands and past United Nations High Commissioner for Refugees *Report of the Commissioner of Education USA.
