are urgent questions and no discipline is better placed to address them than anthropology. It does so by bringing to bear the wisdom and experience of people everywhere whatever their backgrounds and walks of life. In this passionately argued book Tim Ingold relates how a field of study once committed to ideals of progress collapsed amidst the ruins of war and colonialism only to be reborn as a discipline of hope destined to take centre stage in debating the most pressing intellectual, ethical and political issues of our time. Anthropology seeks to understand the roots of our common humanity, the diversity of cultures and world views and the organisation of social relations and practices. As an accessible entry point for upper level students and first year undergraduates new to the study of anthropology, this reader also offers guidance for teachers in exploring the subject's riches with their students. That anthropology is an immensely expansive inquiry of study is demonstrated by the diversity of its topics: from nature conservation campaigns to witchcraft beliefs, from human evolution to fashion and style and from the repatriation of indigenous human remains to research on literacy. There is no single story of anthropology. Taken together, these fundamental readings are evidence of a contemporary, vibrant subject that has much to tell us about all the worlds in which we live.
