Social Capital in the Knowledge Economy Hans Westlund, 2006-09-24 It is possible that there once was a time when scholars used to sit isolated with their cogitations in their attics emerging now and then to publish their latest e dite offerings which no one had ever thought of before If such a time did once ist it certainly does so no longer Writing a scientific or scholarly book in our era is to a large extent a team effort in which your team members are continually changing and you are unceasingly grateful for the privilege of enjoying and be fitting from the exertions ideas comments and support of a large number of very able people Scientific and scholarly work nowadays is a process impossible wi out the existence and use of social capital This book is no exception to the above stated There are very many colleagues some of them referees and thus anonymous and friends who have made the book possible The foremost of these is Roger Bolton with whom I wrote my first paper on social capital Most of that paper has found its way into various passages of this book while Chapter 6 Social Capital and Entrepreneurship comes almost c pletely from Roger s pen Thank you Roger for letting me use your text The empirical studies of the biotech industries of Japan California and Sweden would have been impossible without a great deal of help

The Strategic Value of Social Capital Francesca Masciarelli, 2011 This is an outstanding book by an outstanding scholar This is the first book to really explain what social capital means and how and why firms generate value and profit from social capital The author combines a rigorous approach to empirical evidence in support of her arguments with new theoretical insights This is a must read for all those concerned with firm competitiveness knowledge acquisition and social capital theory Michael G Hobday University of Sussex UK This groundbreaking book explores whether how and why firms may generate value from social assets Based on original empirical evidence this is the first book that systematically integrates different approaches to social capital and develops a new and more comprehensive framework that relates social capital to various firm s strategies The author delves deeply into the nature dimensions and dynamics of social capital deploying research and analytical techniques from a wide variety of disciplines including the theory of the firm entrepreneurship regional studies strategic management international business and innovation studies Francesca Masciarelli provides insights into a new multilevel configuration of social capital and supports this with an abundance of empirical evidence

Women Entrepreneurship and Social Capital Iiris Aaltio-Marjosola, Paula Kyrö, Elisabeth Sundin, 2008 Human resources are the social capital of a firm or business based on trust as well as on expertise values and cultural diversity This calls for cross cultural knowledge an understanding of gender issues and individual differences in the social capital of the firm and society The dialogue between women entrepreneurship and social capital theory research strengthens the fragmented voice of women entrepreneurship providing

the landscape for women entrepreneurs as creators of and created by social capital. It indicates how women entrepreneurs appear to have a special position in forming, developing and reorganizing the social capital in the business world. This book explores social capital in the multiple relationships between gender, management and entrepreneurship. Twenty-six researchers representing a variety of disciplines from different parts of the world provide findings on diverse aspects of the dialogue between women entrepreneurship and social capital. As a consequence, the central concepts, social capital, entrepreneurship and gender are given a variety of meanings. Women entrepreneurs and business owners, regardless of their cultural context, branch and education, provide interesting ideas to the global debate on equality and social capital.

The Social Capital of Entrepreneurial Newcomers Robert Lee, 2017-03-30. Lee takes the oft-cited belief that entrepreneurial endeavour lives and dies by the quality of the networks set in play and subjects it to a rigorous and sustained analysis. In this, he not only provides the reader with an authoritative theoretical and empirical foray into how entrepreneurs can create and sustain different forms of social capital, he does so with a strong sense of how power frames and taints its acquisition and use. Lee's book is a valuable contribution to our understanding of how, in entrepreneurial activity as in many walks of life, it is those with already established status who set the agenda by which opportunity and its pursuit is constituted.

Robin Holt, Professor of Entrepreneurship, Politics and Society, Copenhagen Business School, Denmark. Robert Lee drives forward the agenda of socially situated cognition research, moving beyond a static model of entrepreneurial cognition and offering instead a dynamic, socially embedded, communication-based perspective. He breaks from the traditional focus on either the individual entrepreneurial agent or the social and institutional context of entrepreneurship and makes a serious and skilful effort to provide an integrative understanding of the entrepreneur as placed in a complex relational and ambiguous context. Recognising that entrepreneurship is both cognitive and relational, he plays with the idea of power within legitimacy creation and through this illustrates the ultimately distributed nature of entrepreneurial processes. This book adds to the growing domain of socially situated entrepreneurial cognition research and will appeal to those interested in understanding the connection between cognition, communication and legitimacy in the context of entrepreneurship.

Jean Clarke, Professor of Entrepreneurship and Organization, Leeds University Business School, University of Leeds, UK. In a very welcome contribution to the literature, Robert Lee explores the social capital mobilised by entrepreneurs and develops a communicative action approach that yields important insights into how would-be entrepreneurs achieve legitimacy through navigating the complex web of power and status relations in which they are enmeshed. This book will appeal not only to those interested in entrepreneurship but also be a valuable reference source for those interested in the workings of social capital.

Michael Bresnen, Professor of Organisation Studies, Alliance Manchester Business School, University of Manchester, UK. This book presents a novel and intellectually stimulating account of the understudied links between entrepreneurial newcomers, bridging ties and their networked cognition. With a paucity of research addressing cognitively specific features of networked

language and conduct The Social Capital of Entrepreneurial Newcomers explores how entrepreneurial newcomers attune their cognition when interacting with high status and powerful vertical bridges Largely reflecting communication accommodation perspectives the author theoretically and empirically examines entrepreneurial newcomers cognitive convergence and divergence when bridging The Creation and Destruction of Social Capital Gunnar Lind Haase Svendsen, Gert Tinggaard Svendsen, 2004 Social capital and trust matter in the real world say Gunnar U of Southern Denmark and Gert economics Aarhus School of Business but discussion of them is missing from the literature on economic growth and welfare in economics They investigate how social capital is created and destroyed through an interdisciplinary approach combining politi *The Knowledge Effects of Founders' Human and Social Capital on Entrepreneurship* Anastasia Veronica Graham Bailey, 2016 The purpose of this dissertation is to understand how entrepreneurial firms founders develop the knowledge they need to identify novel opportunities I argue that founders human capital and social capital jointly influence the knowledge that they draw upon and that this knowledge affects the nature of the opportunities they pursue I draw on the organizational learning innovation and entrepreneurship literatures to make the point that variations in founders human and social capital characteristics affect the knowledge that they are able to access This in turn shapes their understanding of the market and influences their alertness to unique opportunities Kirzner 1997 Shane 2000 The focus on novelty in this research is a departure from the typical approach in the entrepreneurship literature which focuses on the number of opportunities identified Gruber Macmillan and Thompson 2013 Shane and Venkataraman 2000 More novel opportunities generate new products or services Amabile 1996 West 2002 and thus represents a more meaningful measure of the potential value of an opportunity I develop three studies as part of this dissertation to examine different aspects of the relationships between human and social capital and opportunity identification The first is a qualitative study that explores how founders human capital interacts with their social capital to shape the nature of the entrepreneurship opportunity identified Given that we have limited theory on the combined effects of human and social capital particularly as they relate to differing combinations low versus high human and social capital a qualitative approach assists in uncovering the role each plays in influencing novelty of opportunity identification The data yielded a 2x2 model by which founders were categorized based on low and high levels of human and social capital The evidence indicated that the nature of the opportunity an entrepreneur identifies is systematically related to his or her business specific human and instrumentally based social capital Differing combinations of human and social capital gave rise to differing levels of novelty in the opportunity pursued While low levels of both human and social capital resulted in the lowest level of opportunity novelty high levels of both types of capital were associated with the highest level of opportunity novelty The findings also supported the notion that the nature of knowledge embedded in human and social capital is not the same and therefore each yields different novelty benefits The results of this qualitative analysis provide layered insight into how human and social capital drives novelty of opportunity

Capital and Governance Charlie Karlsson, Börje Johansson, Roger Stough, 2012-01-01 This book highlights the role of entrepreneurship social capital and governance for regional economic development In recent decades many researchers have claimed that entrepreneurship is the most critical factor in sustaining regional economic growth However most entrepreneurship research is undertaken without considering the fundamental importance of the regional context Other research has emphasized the role of social capital but there are substantial problems in empirically relating measures of

social capital to regional economic development The expert contributors to this work highlight the role of governance in regional growth an area that has so far been relatively under researched underpinning their findings with new theoretical and empirical evidence They conclude that the relationship between entrepreneurship social capital and governance in factors affecting regional economic development are complex and interdependent and that to influence these factors and the relationship between them policymakers must have a long term perspective and be both patient and persistent in their efforts This enlightening book will be of great interest to academics students and researchers across a range of fields including regional science regional economics economic geography regional planning public policy entrepreneurship political science and economic sociology Policymakers involved in regional policymaking from national down to regional and local levels will also find the book to be an illuminating read

Halstead, Steven C. Deller, 2015-04-24 In Social Capital at the Community Level John Halstead and Steven Deller examine social capital formation beyond the individual level through a variety of disciplines planning economics regional development sociology as well as non traditional approaches like engineering and built environmental features The notion of social capital in community and economic development has become a focus of intense interest for policy makers practitioners and academics The notion is that communities with higher levels of social capital networks trust and norms will prosper both economically and socially In a practical sense how do communities use the notion of social capital to build policies and strategies to move their community forward Are all forms of social capital the same and do all have a positive influence on the community To help gain insights into these fundamental questions Social Capital at the Community Level takes a holistic interdisciplinary or systems approach to thinking about the community While those who study social capital will acknowledge the need for an interdisciplinary approach most stay within their disciplinary silos One

could say there is strong bonding social capital within disciplines but little bridging social capital across disciplines The contributors to Social Capital at the Community Level have made an attempt to build that bridging social capital While disciplinary biases and research approaches are evident there is significant overlap about how people with different disciplinary perspectives think about social capital and how it can be applied at the community level This can be from neighborhoods addressing a localized issue to a global response to a natural disaster This book is an invaluable resource for scholars researchers and policy makers of community and economic development as well as rural sociologists and planners looking to understand the opaque process of social capital formation in communities
