The Kid A Dogs Life:

Futurescapes Ralph Pordzik, 2009 This book testifies to the growing interest in the many spaces of utopia It intends to map out on utopian and science fiction discourses some of the new and revisionist models of spatial analysis applied in Literary and Cultural Studies in recent years The aim of the volume is to side step the established generic binary of utopia and dystopia or science fiction and thus to open the analysis of utopian literature to new lines of inquiry The essays collected here propose to think of utopias not so much as fictional texts about future change and transformation but as vital elements in a cultural process through which social spatial and subjective identities are formed Utopias can thus be read as textual systems implying a distinct spatial and temporal dimension as spatial practices that tend to naturalize a cultural and social construction that of the good life the radically improved welfare state the Christian paradise the counter society etc and make that representation operational by interpellating their readers in some determinate relation to their givenness as sites of political and individual improvement This volume is of interest for all scholars and students of literature who wish to explore the ways in which utopias of the past and recent present have circulated as media of cultural exchange and homogenization as sites of cultural and linguistic appropriation and as foci for the spatial formation of national and regional identities in the English speaking world

Children, Dogs and Education Mary Renck Jalongo, 2018-05-08 This book brings together authoritative information about the child dog bond as it is manifested with family dogs visiting therapy dogs and service dogs trained to assist children with disabilities Despite the widely accepted view that participating in a dog s care and interacting with dogs in behaviorally healthy ways is a route to becoming responsible and compassionate research on this complex dynamic is difficult to design time consuming to collect and challenging to analyze This volume synthesizes theory research and practice bringing all to bear upon child dog interactions in homes schools libraries and the community at large Children Dogs and Education serves as a handbook for a diverse group of adults who seek to build positive relationships between children and dogs parents families professional dog trainers teachers librarians mental health professionals health care professionals and university faculty The study of interactions between human and nonhuman animals has captured the imagination of an international community of researchers from many different fields and professions Even though dogs are ubiquitous in the lives of most children studies of children s interactions with dogs in families and communities are lacking Most of the previous research on the human canine bond has focused on adolescents and adults or even when younger children are the focus it has tended to rely on parents to speak for children There are three features of this book that make it unique First it goes beyond exploring the child dog bond to examine additional important issues including children s concepts of responsible care their ability to interpret dogs behavioral cues and their ideas about canine behavioral issues training Second unlike most other work to date it represents children s voices through cases interviews and drawings Finally the contributors to this edited work use their collective wisdom to draw educational

implications and suggest direction in preparing the next generation of dog guardians
