Frederick Charles Dietz

The Kings Household In England Before The Norman Conquest:

The King's Household in England Before the Norman Conquest Laurence Marcellus Larson, 1904 *The King's Household in England Before the Norman Conquest ...* Laurence Marcellus Larson, 1904 Kings and Lords in Conquest England Robin Fleming, 1991 One of the most stimulating and original contributions to Conquest studies covering the period 950-1086 A Political and Social History of England Frederick Charles Dietz, 1927 The Government of England Under Henry I Judith A. Green, 1986 This is a full length analysis of the machinery and men of government under Henry I which looks in much greater detail than is possible for other contemporary states at the way government worked and at the careers of royal servants Royal government in England in the early twelfth century was developing fast under political and military pressures At the centre above all during the king's long absences in Normandy new ways of supervision were found especially in the financial field Government also provided distinct opportunities in administration and for the first time it is possible to identify a number of men who were effectively professional administrators The book will therefore become essential reading on the reign of Henry I and on the general development of English government in the twelfth century

English Constitutional History from the Teutonic Conquest to the Present Time Thomas Pitt

Taswell-Langmead, 1929 *The Normans and the Norman Conquest* R. Allen Brown, 1985 Classic work assessing the impact of the Norman Conquest in European context The introduction of Brown's book should be made compulsory reading LONDON REVIEW OF BOOKS The English who faced the forces of William duke of Normandy on 14 October 1066 were by no means a pure bred and unified race nor was the flower of England's manhood laid low by an army of self seeking Norman opportunists R Allen Brown traces the forces and influences that shaped both England and Normandy in the decades before 1066 and shows how the new order emerging from the aftermath of the battle of Hastings produced a degree of political unity and social dynamism previously unknown in England bringing a reinvigorated nation fully into the mainstream of the dynamic expansion of western Latin Christendom R ALLEN BROWN was professor of History at King's College London and founder of the annual Battle Conference on Anglo Norman studies **Publications. Historical Series** University of Manchester, 1927 The Formation of the English Kingdom in the Tenth Century George Molyneux, 2015-05-08 The central argument of *The Formation of the English Kingdom in the Tenth Century* is that the English kingdom which existed at the time of the Norman Conquest was defined by the geographical parameters of a set of administrative reforms implemented in the mid to late tenth century and not by a vision of English unity going back to Alfred the Great 871-899 In the first half of the tenth century successive members of the Cerdicing dynasty established a loose domination over the other great potentates in Britain They were celebrated as kings of the whole island but even in their Wessex heartlands they probably had few means to regulate routinely the conduct of the general populace Detailed analysis of coins shires hundreds and wapentakes suggests that it was only around the time of Edgar 957-997 that the Cerdicing kings developed the relatively

standardised administrative apparatus of the so called Anglo Saxon state This substantially increased their ability to impinge upon the lives of ordinary people living between the Channel and the Tees and served to mark that area off from the rest of the island The resultant cleft undermined the idea of a pan British realm and demarcated the early English kingdom as a distinct and coherent political unit In this volume George Molyneux places the formation of the English kingdom in a European perspective and challenges the notion that its development was exceptional the Cerdicings were only one of several ruling dynasties around the fringes of the former Carolingian Empire for which the late ninth tenth and eleventh centuries were a time of territorial expansion and consolidation English Society in the Eleventh Century Paul

Vinogradoff,1908 A History of Great Britain Howard Robinson,1927 **Feudal Empires** John F. Le Patourel,1984-07-01

This is a collection of the selected papers of John La Patourel considered by him to be the most representative of his body of work on the Norman and Plantaganet feudal empires A striking feature of this anthology is the unity modification and development of Professor Le Patourel s thought from his earliest to the latest essays included Adopting a comparative framework and looking at topics such as the Channel Islands in the early middle ages Normandy and England from 1066 1144 the Angevin Empire the Hundred Years War and the Treaty of Br tigny Professor La Patourel s work yields new insights and understandings in the history of 14th century Europe **The Medieval English Sheriff to 1300** William Alfred

Morris,1927 A Companion to the Anglo-Norman World Christopher Harper-Bill,Elisabeth M. C. Van Houts,2007 This is an introduction to the history of England and Normandy in the 11th and 12th centuries Within the broad field of cultural history there are discussions of language literature the writing of history and ecclesiastical architecture **The Image of**

Aristocracy David Crouch,2005-11-29 David Crouch provides a broad definition of aristocracy by examining the ways aristocrats behaved and lived between 1000 and 1300 He analyses life style class and luxurious living in those years A distinctive feature of the book is that it takes a British rather than Anglocentric view looking at the penetration of Welsh and Scottish society by Anglo French ideas of aristocracy The Medieval English Sheriff to 1300 William Alfred Morris,1968

Trade, Money, and Power in Medieval England Pamela Nightingale,2023-05-31 The sixteen articles in this collection analyse the contribution made by overseas trade and the wealth in coin which it created to the development of the English economy and locate this in an European wide setting In time they range from the late Anglo Saxon period up to the advent of the Tudors The papers include general surveys of the importance of coinage and credit in the rise and decline of a market economy and of the way that credit functioned in a society that lacked reliable supplies of bullion and which was also subject to the scourges of warfare and devastating disease They illustrate too how from the tenth century the English crown used its control and exploitation of the coinage as part of a sophisticated fiscal system which helped create the precocious power of the English state The author further shows how the wool trade altered the geographical pattern of wealth and enriched peasants landowners and merchants while the competing interests involved in the trade also cause political conflicts in

Parliament and in the government of London during the period when London was establishing itself as the political capital and the financial centre of the kingdom The King's Servants G. E. Aylmer,1974 **Publications of the University of Manchester** ,1920 *An Anglo-Saxon and Celtic Bibliography (450-1087)*. Wilfrid Bonser,1957
