The Alliance Revolution Benjamin Gomes-Casseres, 1996 More than we ever anticipated alliances among firms are changing the way business is conducted particularly in the global high technology sector The reasons are clear companies must increasingly pool their capabilities to succeed in ever more complex and rapidly changing businesses But the consequences for managers and for the economy have so far been underestimated In this new book Benjamin Gomes Casseres presents the first in depth account of the new world of business alliances and shows how collaboration has become part of the very fabric of modern competition Alliances he argues create new units of competition that do battle with one another and with traditional single firms The flexible capabilities of these multi firm constellations give them advantages over single firms in certain contexts offsetting the advantage of a single firm s unified control When managed effectively alliances can strengthen a firm s competitive advantage and narrow the gap between leading firms and second tier players This often results in intensified rivalry and the competition within an industry is transformed Alliances often spread swiftly through an industry as firms jockey for advantage Yet the very spread of alliances increases their costs and poses new limits on their use Gomes Casseres concludes that firms need to manage their constellations to enhance collaboration within their groups while raising what he calls

barriers to collaboration for rivals These ideas are developed and illustrated through original case studies of alliances among U S Japanese and European firms in electronics and computers including Xerox IBM and Fujitsu as well as other small and large companies The book should be of interest to business academics managers and general readers concerned with contemporary capitalism

Invention and the Rise of Technocapitalism Luis Suarez-Villa,2000 In the context of the historic evolution of capitalism Suarez Villa social ecology U of California Irvine explores the advent of a form of market capitalism rooted in invention and the development of new technologies He examines the infrastructure that supports invention and the relationship of techno capitalism with science corporate business and government Annotation copyrighted by Book News Inc Portland OR
