 European Union Committee,2006-03-16 This report by the European Union Committee examines the progress of the
 European Union in initiating a strategy for jobs and growth across the Community as a whole The background to this report
 stems from the Spring European Council meeting in 2000 in Lisbon and the launch of an economic reform agenda The
 Committee observes that since the Lisbon Agenda little progress has been made and the performance of many of the larger
 European economies has been poor The Committee has noted that certain worrying signs of protectionist behaviour have
 developed especially regarding barriers of cross border mergers The EU has recognized this weak performance and the
 Agenda was relaunched in 2005 with a greater focus on the key economic priorities of more growth and jobs Also all Member
 States are now required to produce an annual National Action Plan highlighting the policies being pursued to improve
 economic growth and increase employment The Committee sets out a number of recommendations to further push forward
 the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal
 market that Member States should influence one another in the development of good practice through statistical comparison

of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile
