Here Burkard Polster shows how to invent your own variants of the Spot It card game. Steven Strogatz presents young Albert Einstein's proof of the Pythagorean Theorem. Joseph Dauben and Marjorie Senechal find a treasure trove of math in New York's Metropolitan Museum of Art, and Andrew Gelman explains why much scientific research based on statistical testing is spurious. In other essays, Brian Greene discusses the evolving assumptions of the physicists who developed the mathematical underpinnings of string theory. Jorge Almeida examines the misperceptions of people who attempt to predict lottery results, and Ian Stewart offers advice to authors who aspire to write successful math books for general readers. And there's much, much more. In addition to presenting the year's most memorable writings on mathematics, this must-have anthology includes a bibliography of other notable writings and an introduction by the editor, Mircea Pitici. Learn about Maria Grever, What a Difference a Day Made, who was the first female Mexican to achieve international acclaim, and the fascinating story of African American lyricist Lucy Fletcher. Sugar Blues, among many others. Women in the popular music business went through struggles different from their male colleagues, making their triumphs all the more impressive. Their combined sagas convey an epic about women in the world of American popular music.
