*Plastic Glasses and Church Fathers* David Kronenfeld, 1996-04-11 Meaning seems to shift from context to context how do we know when someone says grab a chair that an ottoman or orange crate will do but when someone says let s buy a chair they won t Somehow in spite of this slipperiness we usually understand each other in conversations and have straightforward ways of querying each other when we sense a gap in understanding We seem capable of using ordinary language to communicate with as much precision as we are willing to take the time and effort for through attention to interactive feedback and the use of paraphrastic modification specification and explication In *Plastic Glasses and Church Fathers* Kronenfeld offers a theory that explains both the usefulness of language s variability of reference and the mechanisms which enable us to understand each other in spite of the variability His theory is rooted in the tradition of ethnoscience or cognitive anthropology a tradition which promotes an ethnography of explicit methodology and mathematically precise theory while remaining responsive to the complexity of particular cultures Kronenfeld accomplishes three things with his theory First he distinguishes prototypic referents from extended referents Second he describes the various bases of semantic extensions Finally he details how we use the situational context of usage the linguistic context of opposition and inclusion and the conceptual context of knowledge about the world to interpret communicative events

### **Kant, Wittgenstein, and the Performativity of Thought**

Aloisia Moser, 2021-08-18 This book explores the idea that there is a certain performativity of thought connecting Kant's Critique of Pure Reason and Wittgenstein's Tractatus Logico Philosophicus On this view we make judgments and use propositions because we presuppose that our thinking is about something and that our propositions have sense Kant's requirement of an a priori connection between intuitions and concepts is akin to Wittgenstein's idea of the general propositional form as sharing a form with the world Aloisia Moser argues that Kant speaks about acts of the mind not about static categories Furthermore she elucidates the Tractatus logical form as a projection method that turns into a so called zero method whereby propositions are merely the scaffolding of the world In so doing Moser connects Kantian reflective judgment to Wittgensteinian rule following She thereby presents an account of performativity centering neither on theories nor methods but on the application enacting them in the first place
