lakes and swamps They are substantially larger with some individuals weighing up to 200 pounds with shells measuring 26 inches or more This species is known for its striking spiked shell and a peculiar pink worm like appendage in its mouth that it employs as a bait to entice prey These turtles are more passive hunters resting stationary on river or lake bottoms with their jaws open to catch fish Because of its size food needs and habitat requirements the alligator snapping turtle is regarded more difficult to care for as a pet Snapping-turtle guides ,2003 Alligator Snapping Turtle Charlotte Samuel,2020-06-24
