This professional learning programme for Key Stage 2 mathematics teaching is grounded in the latest research on the characteristics of effective professional development. The materials help teachers deepen their content knowledge for important mathematical concepts in their grade, increase their understanding of how students learn these mathematical ideas, use their knowledge to develop effective lessons and improve instruction, enhance their collaboration skills. As our world experiences political polarization, pandemics, heightened racial tension and the evolving awareness of gender and LGBTQ issues, this textbook addresses those topics as they show up in the early childhood classroom, offering research-informed, practical guidance for pre- and in-service teachers. The book is organized around 12 themes, 10 of which are based on the National Council for Social Studies (NCSS) themes, in addition to the anti-racist, anti-bias curriculum and gender-expansive principles from the National Association for the Education of Young Children (NAEYC), closely following social studies content standards from across the United States. The themes covered are culture and cultural diversity, history, geography, identity, gender roles and gender identity, institutions, power and authority, economics, science and technology, global citizenship and civic ideals and practice. Throughout each chapter, you will come to know 5 early childhood classrooms and including profiles of the teachers, students, communities. These five spaces represent a variety of early childhood teachers, different age groups.

of students and diverse communities and show how the lesson learned in each chapter can be applied in classroom settings This book provides developmentally appropriate ways to teach relevant and current social studies content to our very youngest learners emphasizing the fact that these very children will grow to be the next stewards of our global community
