Social Capital at the Community Level John M. Halstead,Steven C. Deller,2015-04-24 In Social Capital at the Community Level John Halstead and Steven Deller examine social capital formation beyond the individual level through a variety of disciplines planning economics regional development sociology as well as non traditional approaches like engineering and built environmental features The notion of social capital in community and economic development has become a focus of intense interest for policy makers practitioners and academics The notion is that communities with higher levels of social capital networks trust and norms will prosper both economically and socially In a practical sense how do communities use the notion of social capital to build policies and strategies to move their community forward Are all forms of social capital the same and do all have a positive influence on the community To help gain insights into these fundamental questions Social Capital at the Community Level takes a holistic interdisciplinary or systems approach to thinking about the community While those who study social capital will acknowledge the need for an interdisciplinary approach most stay within their disciplinary silos One could say there is strong bonding social capital within disciplines but little bridging social capital across disciplines The contributors to Social Capital at the Community Level have made an attempt to build that bridging social capital While disciplinary biases and research approaches are evident there is significant overlap about how people with different disciplinary perspectives think about social capital and how it can be applied at the community level This can be from

David Garson, 2000 This anthology brings together multiple viewpoints on the social dimensions of the revolution in information technology The chapters cover social political educational personal and international dimensions of information technology impacts Each chapter focuses on different aspects of the effects of computing and the new information technologies that have accelerated every area of human life This book raises important issues with profound implications for public policy and societal development *The Social Capital of Entrepreneurial Newcomers* Robert Lee, 2017-03-30 Lee takes the oft cited belief that entrepreneurial endeavour lives and dies by the quality of the networks set in play and subjects it to a rigorous and sustained analysis In this he not only provides the reader with an authoritative theoretical and empirical foray into how entrepreneurs can create and sustain different forms of social capital he does so with a strong sense of how power frames and taints its acquisition and use Lee's book is a valuable contribution to our understanding of how in entrepreneurial activity as in many walks of life it is those with already established status who set the agenda by which opportunity and its pursuit is constituted Robin Holt Professor of Entrepreneurship Politics and Society Copenhagen Business School Denmark Robert Lee drives forward the agenda of socially situated cognition research moving beyond a static model of entrepreneurial cognition and offering instead a dynamic socially embedded communication based perspective He breaks from the traditional focus on either the individual entrepreneurial agent or the social and institutional context of entrepreneurship and makes a serious and skilful effort to provide an integrative understanding of the entrepreneur as placed in a complex relational and ambiguous context Recognising that entrepreneurship is both cognitive and relational he plays with the idea of power within legitimacy creation and through this illustrates the ultimately distributed nature of entrepreneurial processes This book adds to the growing domain of socially situated entrepreneurial cognition research and will appeal to those interested in understanding the connection between cognition communication and legitimacy in the context of entrepreneurship Jean Clarke Professor of Entrepreneurship and Organization Leeds University Business School University of Leeds UK In a very welcome contribution to the literature Robert Lee explores the social capital mobilised by entrepreneurs and develops a communicative action approach that yields important insights into how would be entrepreneurs achieve legitimacy through navigating the complex web of power and status relations in which they are enmeshed This book will appeal not only to those interested in entrepreneurship but also be a valuable reference source for those interested in the workings of social capital Michael Bresnen Professor of Organisation Studies Alliance Manchester Business School University of Manchester UK This book presents a novel and intellectually stimulating account of the understudied links between entrepreneurial newcomers bridging ties and their networked cognition With a paucity of

research addressing cognitively specific features of networked language and conduct The Social Capital of Entrepreneurial Newcomers explores how entrepreneurial newcomers attune their cognition when interacting with high status and powerful vertical bridges Largely reflecting communication accommodation perspectives the author theoretically and empirically examines entrepreneurial newcomers cognitive convergence and divergence when bridging *Social Capital* Mudit Kumar Singh,2024-03-07 Providing practical recommendations for leveraging social capital for social good this is a valuable thought provoking and timely exploration of the multifaceted concept of social capital in the context of the digital revolution

Johansson,Roger Stough,2012-01-01 This book highlights the role of entrepreneurship social capital and governance for regional economic development In recent decades many researchers have claimed that entrepreneurship is the most critical factor in sustaining regional economic growth However most entrepreneurship research is undertaken without considering the fundamental importance of the regional context Other research has emphasized the role of social capital but there are substantial problems in empirically relating measures of social capital to regional economic development The expert contributors to this work highlight the role of governance in regional growth an area that has so far been relatively under researched underpinning their findings with new theoretical and empirical evidence They conclude that the relationship between entrepreneurship social capital and governance in factors affecting regional economic development are complex and interdependent and that to influence these factors and the relationship between them policymakers must have a long term perspective and be both patient and persistent in their efforts This enlightening book will be of great interest to academics students and researchers across a range of fields including regional science regional economics economic geography regional planning public policy entrepreneurship political science and economic sociology Policymakers involved in regional policymaking from national down to regional and local levels will also find the book to be an illuminating read **Nurturing Social Capital in Excluded Communities** Julia Preece,2018-02-06 This title was first published in 2000 Emanating from a two year action research project aimed at devising higher education courses for excluded social groups this book examines ways in which UK higher education can be accessed and valued by adults who have previously been excluded It also explores

Youth Sport and Social Capital Sean F. Brown, 2020-06-04 This book examines the youth sport parent experience through the lens of social capital a cornerstone social science concept of the past 30 years Social capital reflects the value of one's social networks and the actual and potential benefits and costs of relationships Bringing together a team of kids for a season also brings together their families who all must negotiate this new social world Within this world relationships are bound to form and these are the foundation upon which this project rests Youth sport scholars have traditionally been interested in questions such as how many kids play sports what sports they play how and why do they start playing and stop playing and the costs and benefit of participation However aside from sensational examples of youth sport parents behaving badly scholars know far less about the parental experience This time is meaningful for parents because parents often spend as much or even more time at the

fields than their children It is thus worth examining what they might get out of this investment Utilizing two years of fieldwork and over 30 interviews with parents and board members of a youth baseball league in the southwestern United States this book provides an inside look at the beneficial relationships that can be found in the bleachers of a kids baseball game as well as the unseen high stakes games waged in the boardroom where relationships can carry heavy costs as well This book was originally published as a special issue of *Sport in Society* *Creation and Returns of Social Capital* Henk Flap, Beate Völker, 2004-08-02 The idea of a social capital research program has become increasingly significant within the social sciences This collection of essays considers integration and standardization of measurement instruments and research on social capital *Theories of Social Capital* Ben Fine, 2010-01-11 Tracing the evolution of social capital since his highly acclaimed contribution of 2001 *Social Capital Versus Social Theory* Ben Fine consolidates his position as the world's leading critic of the concept Fine forcibly demonstrates how social capital has expanded across the social sciences only by degrading the different disciplines and topics that it touches a McDonaldisation of social theory The rise and fall of social capital at the World Bank is critically explained as is social capital's growing presence in disciplines such as management studies and its relative absence in others such as social history Writing with a sharp critical edge Fine not only deconstructs the roller coaster presence of social capital across the social sciences but also draws out lessons on how and how not to do research
