McMillan, 2021-12-14 The primary focus of this volume is to bring to the fore the contribution of McClendon and Smith's work on convictions and the application of that work in helping understand the processes of moral reasoning in the context of conflict Both were indebted to Zuurdeeg and their concept was incorporated in models of moral reasoning by Baptist scholars Glen Stassen and Parush Parushev The usefulness of the concept is critically evaluated The volume concludes with a case study on the conflict in Northern Ireland including the role of religion and the key issues raised in the referendum on the Belfast Agreement in 1998 It includes an examination of the contribution of four Christian groups in Northern Ireland who publicly engaged in this six week period of intense and passionate debate on the Agreement and the difficult issues it

addressed as the focus for examining and testing the application of the model of moral reasoning On the basis of the case study is demonstrated that the concept of convictions can prove to be a helpful means of getting to the heart of what drives moral reasoning in contexts of conflict The purpose of this book is to issue a call to engage with critique and consider the importance and application of a much undervalued methodological approach to discerning the convictions that are the primary influencers of thought and action

### **Minority Women**

**Entrepreneurs** Mary Godwyn, Donna Stoddard, 2017-09-08 How does gender and minority status shape entrepreneurial decision making This question seems long overdue since minority women in the US start new businesses at four times the rate of non minority men and women This book is about minority women entrepreneurs in the United States Though these women are thriving as business owners their stories are very seldom told and few think of minority women as successful entrepreneurs Therefore the first purpose of the book is to give voice and visibility to US minority women business owners The second purpose is to explain what makes these women different from the standard white male business owners most people are familiar with Through in depth interviews and first hand accounts from minority women entrepreneurs the authors found that in innovative and exciting ways minority women use their outsider status to develop socially conscious business practices that support the communities with which they identify They reject the idea that business values are separate from personal values and instead balance profits with social good and environmental sustainability This pattern is repeated in statistical evidence from around the globe that women contribute a much higher percentage of their earnings to social good than do men but until now there was no clear explanation of why Using sociological and psychological theories the authors explain why women especially minority women have a tendency to create socially responsible businesses The innovations provided by the women in this study suggest fresh solutions to economic inequality and humanistic alternatives to exploitative business policies This is a radically new socially integrated model that can be used by businesses everywhere This book is intended for undergraduate and graduate students of business sociology race and gender studies as well as practitioners of entrepreneurship aspiring entrepreneurs and all those looking for new examples of holistic sustainable and socially responsible business practices

environmental factors play a far greater role than biological ones Laying out the steps for a mental health system that helps rather than harms Marieke Bigg asks how can we heal when faced with an industry that banks on keeping us sick

### **Issues in Contemporary International Health**

Stacey B. Day,T.A. Lambo,2013-12-14 Dr Oliver Wendell Holmes was once asked When should the training of a child commence A hundred years before birth was the reply Indeed it is this perspective on life through posterity that underlies the maturing field of international health embracing as it does a responsibility for and an awareness of the needs of all peoples The concepts of international health are increasingly revitalizing modern medicine as it attempts to relieve mankind of the burden of disease Curative medicine once the paradigm took a relatively beneficial approach to treatment But

epidemiological recognition of the frequency of disease on a global basis and an appreciation of the vast number of those afflicted evoked a humiliating backlash of awareness that curative medicine alone neither constrains disease nor permanently advances human health happiness or longevity The growing reliance on truly international health strategies by national and international agencies including the more definite and extended practice of preventive medicine has provided the means to achieve significant gains in the quality of health in years to come A redeeming feature of contemporary failures in science and medicine is that once intelligently studied analyzed and evaluated even these failed efforts may provide real insights that can mold our capacity and determination So it is that more than in any bygone age the past ten years have seen the implementation of a sound and systematic infrastructure for international health undertakings thus paving the way for improved health for all
