The Loss of Sadness Allan V. Horwitz, Jerome C. Wakefield, 2007-06-18 Depression has become the single most commonly treated mental disorder amid claims that one out of ten Americans suffer from this disorder every year and 25% succumb at some point in their lives Warnings that depressive disorder is a leading cause of worldwide disability have been accompanied by a massive upsurge in the consumption of antidepressant medication widespread screening for depression in clinics and schools and a push to diagnose depression early on the basis of just a few symptoms in order to prevent more severe conditions from developing In The Loss of Sadness Allan V Horwitz and Jerome C Wakefield argue that while depressive disorder certainly exists and can be a devastating condition warranting medical attention the apparent epidemic in fact reflects the way the psychiatric profession has understood and reclassified normal human sadness as largely an abnormal experience With the 1980 publication of the landmark third edition of the Diagnostic and Statistical Manual of Mental Disorders DSM III mental health professionals began diagnosing depression based on symptoms such as depressed mood loss of appetite and fatigue that lasted for at least two weeks This system is fundamentally flawed the authors maintain because it fails to take into account the context in which the symptoms occur They stress the importance of distinguishing between abnormal reactions due to internal dysfunction and normal sadness brought on by external circumstances Under the current DSM classification system however this distinction is impossible to make so the expected emotional distress caused by upsetting events for example the loss of a job or the end of a relationship could lead to a mistaken diagnosis of depressive disorder Indeed it is this very mistake that lies at the root of the presumed epidemic of major depression in our midst In telling the story behind this phenomenon the authors draw on the 2 500 year history of writing about depression including studies in both the medical and social sciences to demonstrate why the DSM's diagnosis is so flawed They also explore why it has achieved almost unshakable currency despite its limitations Framed within an evolutionary account of human health and disease The Loss of Sadness presents a fascinating dissection of depression as both a normal and disordered human emotion and a sweeping critique of current psychiatric diagnostic

practices The result is a potent challenge to the diagnostic revolution that began almost thirty years ago in psychiatry and a provocative analysis of one of the most significant mental health issues today *Social Change and Society Transformation in the White Nile Province* Hassaballa Omar Hassaballa,1986 Fighting the People's War Jonathan Fennell,2019-01-24 Fighting the People s War is an unprecedented panoramic history of the citizen armies of the United Kingdom Australia Canada India New Zealand and South Africa the core of the British and Commonwealth armies in the Second World War Drawing on new sources to reveal the true wartime experience of the ordinary rank and file Jonathan Fennell fundamentally challenges our understanding of the War and of the relationship between conflict and socio political change He uncovers how fractures on the home front had profound implications for the performance of the British and Commonwealth armies and he traces how soldiers political beliefs many of which emerged as a consequence of their combat experience proved instrumental to the socio political changes of the postwar era Fighting the People s War transforms our understanding of how the great battles were won and lost as well as how the postwar societies were forged **Subject Index of Volumes 52-71**,1953 **DeLisa's Physical Medicine and Rehabilitation: Principles and Practice** Walter R.
