Social Capital Critical Perspectives:

Social Capital Stephen Baron, John Field, Tom Schuller, 2000-11-30 The idea of social capital is increasingly prominent in international national and local policy making and in the social sciences However its rapid rise to prominence has not been matched by proper scrutiny of the idea and its consequences This book provides the first full critical analysis of social capital written by authors from a wide range of disciplinary and policy backgrounds The book asks searching questions Is the concept of social capital really new Does it offer significant analytic purchase Can it be an operational as opposed to rhetorical concept Can policies based on social capital deal with conflict and social exclusion These issues are explored through studies of education health political science urban regeneration economic development and other areas and disciplines The authors who include academics professionals and policy specialists are all distinguished and prominent contributors in their own fields

Social Capital Scott L. McLean, David A. Schultz, Manfred B. Steger, 2002-11 This collection tackles the theme of isolation and the breakdown of mediating social institutions It is in part a response to Robert Putnam's *Bowling Alone* as well as an attempt to create a broader idea of civil society

Social Capital Stephen R. Baron, John Field, Tom Schuller, 2003 Social capital is increasingly influencing international national and local policy making and work within the social sciences This book provides an overview of social capital together with critical discussion

Economics of Social Relations Atilano Pena-López, Matías Membiela-Pollán, 2024-11-22 Starting from the idea that economic relations are social relations and every economic fact is first a social fact this book explores one of the crucial problems within economic science how to embody the social dimension into the study of economic reality from a critical perspective This book opens with an examination of the concept of social capital incorporating all the approaches from the last 30 years of analysis It reviews the two main orientations of existing research programmes in social capital the macro or culturalist perspective and the micro or individual social capital Furthermore it proposes a reconstruction of the theory from a micro perspective Finally taking this approach this book explores the link between social capital and the negative aspects of social reality such as corruption or inequality and through the study of so called relational goods the influence of social capital on subjective well being The analysis of the concept of social capital not only involves economists but also requires a necessary bridge with sociology anthropology political science and even psychology This book will therefore be crucial reading for anyone engaged in the problem of the interrelation between economy and society

The SAGE Handbook of the 21st Century City Suzanne Hall, Ricky Burdett, 2017-10-16 The SAGE Handbook of the 21st Century City focuses on the dynamics and disruptions of the contemporary city in relation to capricious processes of global urbanisation mutation and resistance An international range of scholars engage with emerging urban conditions and inequalities in experimental ways speaking to new ideas of what constitutes the urban highlighting empirical explorations and expanding on contributions to policy and design The handbook is organised around nine key themes through which

familiar analytic categories of race gender and class as well as binaries such as the urban rural are readdressed These thematic sections together capture the volatile processes and intricacies of urbanisation that reveal the turbulent nature of our early twenty first century Hierarchy Elites and Evictions Productivity Over investment and Abandonment Authority Governance and Mobilisations Volatility Disruption and Adaptation Conflict Vulnerability and Insurgency Provisionality Infrastructure and Incrementalism Mobility Re bordering and De bordering Civility Contestation and Encounter Design Speculation and Imagination This is a provocative inter disciplinary handbook for all academics and researchers interested in contemporary urban studies

Social Capital John Field, 2008-04-30 The term social capital is a way of defining the intangible resources of community shared values and trust upon which we draw in daily life It has achieved considerable international currency across the social sciences through the very different work of Pierre Bourdieu in France and James Coleman and Robert Putnam in the United States and has been widely taken up within politics and sociology as an explanation for the decline in social cohesion and community values in western societies It has also been adopted by policy makers particularly in international governmental bodies such as the World Bank This fully revised second edition of *Social Capital* provides a thorough overview of the intense and fast moving debate surrounding this subject This clear and comprehensive introduction explains the theoretical underpinning of the subject the empirical work that has been done to explore its operation and the influence that it has had on public policy and practice It includes guides to further reading and a list of the most important websites

Beyond Social Capital Irene van Staveren, Peter Knorringa, 2007-12-13 This book challenges the mainstream conception of social capital as an individual resource In its place it offers an understanding of social capital as a social phenomenon residing in human relationships

Critical Perspectives in Public Health Judith Green, Ronald Labonté, 2007-10 Combining analytical introductory chapters edited versions of influential articles from the journal *Critical Public Health* and specially commissioned review articles this volume examines the contemporary roles of critical voices in public health research and practice from a range of disciplines and contexts

Youth Programs as Builders of Social Capital Matthew Calvert, Mary Emery, Sharon Kinsey, 2013-08-07 This volume builds understanding of practices in youth and community development that create or build social capital assets at the individual group and community levels The authors explore whether programs contribute to the development of social capital at the individual and community scales thereby fostering and enhancing positive youth development as well as community development It includes articles on defining and measuring social capital through instruments designed to document impact and also to engage program participants The authors then discuss program practices that build social capital in a wide range of youth development settings from community based service learning to 4 H community clubs Finally they focus on building social capital in particular contexts including work in rural communities with the most vulnerable youth The volume is designed to help practitioners Refine their dual focus on youth and community development Clarify constructs that help translate the public

value of positive youth development to community stakeholders Provide examples of practices that link youth and youth programs more intentionally to the social relationships that knit communities together This is the 138th volume of New Directions for Youth Development the Jossey Bass quarterly report series dedicated to bringing together everyone concerned with helping young people including scholars practitioners and people from different disciplines and professions

Social Capital and Economics Asimina Christoforou, John Davis, 2014-05-30 This volume provides a collection of critical new perspectives on social capital theory by examining how social values power relationships and social identity interact with social capital This book seeks to extend this theory into what have been largely under investigated domains and at the same time address long standing classic questions in the literature concerning the forms determinants and consequences of social capital Social capital can be understood in terms of social norms and networks It manifests itself in patterns of trust reciprocity and cooperation The authors argue that the degree to which and the different ways in which people exhibit these distinctively social behaviours depend on how norms and networks elicit their values reflect power relationships and draw on their social identities This volume accordingly adopts a variety of different concepts and measures that incorporate the variety of contextually specific factors that operate on social capital formation In addition it adopts an interdisciplinary outlook that combines a wide range of social science disciplines and methods of social research Our objective is to challenge standard rationality theory explanations of norms and networks which overlook the role of values power and identity This volume appeals to researchers and students in multiple social sciences including economics sociology political science social psychology history public policy and international relations that employ social capital concepts and methods in their research It can be seen as a set of new extensions of social capital theory in connection with its themes of social values power and identity that would advance the scholarly literature on social norms and networks and their impact on social change and public welfare

Networks, Trust and Social Capital Sokratis M. Koniordos, 2017-03-02 The concepts of social networks social capital and trust play an increasingly central role in the social sciences They have become indispensable conceptual tools for the analysis of post industrial late modern societies which are characterized by such features as the relative decline of formal hierarchies the development of flexible social arrangements in the sphere of production and the extreme mobility of capital This is the first book to study the interrelationships between these important concepts both theoretically and empirically Drawing on empirical investigations from a range of diverse European social contexts the contributors develop an economic sociology that builds on and extends established theoretical perspectives The book opens with an introduction to the theoretical ideas relating social capital to reciprocity trust and social networks in line with current debates The authors go on to discuss the concept of social embeddedness addressing the economic effects of social capital by examining the network and trust foundations of labour markets and investigating the structural limits of trusting networks They conclude with an exploration of the impact of networking and the functioning of trust and social capital on the economic arrangements

and performance of nascent capitalist economies in post Communist Europe This thematically unified collection by a team of distinguished contributors from across Europe provides an innovative and distinctive contribution to an expanding area of research

The Family in Question R. D. Grillo, 2008 The family lives of immigrants and ethnic minority populations have become central to arguments about the right and wrong ways of living in multicultural societies While the characteristic cultural practices of such families have long been scrutinized by the media and policy makers these groups themselves are beginning to reflect on how to manage their family relationships Exploring case studies from Austria the Netherlands Norway Portugal Spain Switzerland the United Kingdom and Australia The Family in Question explores how those in public policy often dangerously reflect the popular imagination rather than recognizing the complex changes taking place within the global immigrant community In hoeverre allochtonen vrij zijn hun cultuur te uiten in de multiculturele samenleving staat bijna dagelijks ter discussie in de media en politiek Vaak wordt vergeten dat ook migrantenfamilies zelf worstelen om hun tradities en gebruiken vorm te geven in een pluriforme samenleving waarin relaties met familie zeer complex kunnen zijn In The Family Question worden migrantenfamilies in onder andere Nederland Oostenrijk en Noorwegen onderzocht Hieruit blijkt dat spelers op het vlak van beleidsvorming vaak toegeven aan populaire misverstanden over allochtonen en zo bijdragen aan de heersende xenofobie en stereotypering van immigranten

Contemporary Perspective on Capital in Educational Contexts RoSusan D. Bartee, 2010-08-01 The edited volume Contemporary Perspectives on Capital in Educational Contexts is timely in its unique and appropriate analyses of the prevailing internal and external dynamics of capital as indicative of the type of currency within institutional structures or the currency among individual stakeholders of education The intersection of capital and currency emerges similarly and differently within the American compulsory based system of K 12 and the choice based system of higher education More specifically Contemporary Perspectives on Capital in Educational Contexts disentangles the broader challenges and opportunities of the institution of education and the individuals who comprise Emerging insights from the analyses provide an informed basis for ascertaining the rules of engagement and means of negotiation for the respective constituencies With that said this volume essentially responds to three important questions 1 What are the tenets of capital and currency in public schools and higher education 2 How do institutions and individuals navigate those tenets and 3 What general and specific implications do capital hold for the educational pipeline and beyond These questions provide a useful framework for engaging critical conversations about the dynamics of capital while offering perspectives about how to improve the quality of currency in K 12 or colleges and universities These questions further serve as a basis for eliciting more questions toward the consideration capital as both a conceptual construct and applicable model Contemporary Perspectives on Capital in Educational Contexts too is an expansion of the work of School matters Why African American students need multiple forms of capital where Bartee Brown 2006 examines how the acquisition and possession of capital equips African American

students in a highperforming high achieving magnet school in Chicago for competitiveness in school generated and non school generated activities Success experienced by the students and the school become associated with the academic rigor and reputation while any shortcomings reflect an inadequate capacity of the school or the student to appropriately engage the other School matters Why African American students need multiple forms of capital 2006 further introduces an initial exploration of different forms of capital as producer improve the status quo through inputs consumer participant based upon outputs and regulator maintain the status quo through the process within the educational system The multifaceted role of capital demonstrates its span of influence for institutional and individual capacities *Social Capital and Sport Organisations* Richard Tacon,2021-10-22 Drawing on primary research within voluntary sports clubs in the UK and secondary analysis of the wider international literature on social capital this text focuses on the micro processes of social capital development and how they play out in specific social settings In so doing it adds to existing research by developing a rich contextualised process based view of social capital in action Critically reviewing theoretical and empirical literature on social capital the book highlights the key current debates The empirical core of the book draws on ethnographic observation over 18 months at voluntary sports clubs in the UK including in depth interviews with sports club members and organisers The text explicitly seeks to set this empirical work in its wider context by considering the findings in relation to other international studies of social capital in both sports clubs and other types of organisation The book draws on international research from a whole range of countries UK USA Australia Canada Norway Denmark Netherlands Japan Vanuatu Czech Republic Germany and many others The book establishes a transferable process based understanding of how social capital develops both within sports clubs and beyond This is an illuminating reading for policymakers practitioners and researchers with an interest in the sociology of sport sport development sport management sport policy social theory social policy or social networks *Contexts of Social Capital* Ray-May Hsung,Nan Lin,Ronald L. Breiger,2010-11-24 One of the hottest concepts in international academic social science research social capital refers to the ways in which people make use of social networks in getting ahead This book presents the latest contributions and advances in theory and method in this important field *Race, Neighborhoods, and the Misuse of Social Capital* J. Jennings,2007-05-28 This anthology tackles three key issues how social capital is discussed within the contexts of racial inequality how this dialogue informs public policy regarding neighbourhood revitalization and economic development and how effective a strategy utilization of social capital is for improving inner city living conditions *Creation and Returns of Social Capital* Henk Flap,Beate Völker,2004-08-02 The idea of a social capital research program has become increasingly significant within the social sciences This collection of essays considers integration and standardization of measurement instruments and research on social capital *Social Capital in Political Development in Iran* Ali Abolali Aghdaci,2020-10-21 Aghdaci argues that Iran has not yet sustained political development due to negligence by its leaders resulting in a decline of public trust in post revolutionary governments

He takes a statistical look at the reduction of social capital in Iran and suggests ways this trend can be reversed and political development can be maximized. The role of social capital in political development and their relevance to Hashemi Khatami and Mahmoud Ahmadinejad's presidencies has been relatively neglected in the scholarship. In *Social Capital in Political Development in Iran*, Ali Abolali Aghdaci fills that void by discussing how states can create social development platforms and proposing an integrated model of social capital and political development. Aghdaci argues that the path to peak political development has not yet been sustained by any government in Iran because in all post-revolutionary governments the people's trust in the government has fallen sharply due to the negligence and practices of the leaders in the political system. This book takes a statistical look at the reduction of social capital in Iran and suggests ways this trend can be reversed and political development can be maximized.
