Tally, 2018-11-09 What is our place in the world and how do we inhabit understand and represent this place to others Topophilia gathers essays by Robert Tally that explore the relationship between space place and mapping on the one hand and literary criticism history and theory on the other The book provides an introduction to spatial literary studies exploring in detail the theory and practice of geocriticism literary cartography and the spatial humanities more generally The spatial anxiety of disorientation and the need to know one's location even if only subconsciously is a deeply felt and shared human experience Building on Yi Fu Tuan's topophilia or love of place Tally instead considers the notion of topophilia as a simultaneous sense of place consciousness coupled with a feeling of disorder anxiety and dis ease He argues that no effective geography could be complete without also incorporating an awareness of the lonely loathsome or frightening spaces that condition our understanding of that space Tally considers the tension between the objective ordering of a space and the subjective ways in which narrative worlds are constructed Narrative maps present a way of understanding that seems realistic but is completely figurative So how can these maps be used to not only understand the real world but also to put up an alternative vision of what that world might otherwise be From Tolkien to Cervantes Borges to More Topophilia provides a clear and compelling explanation of how geocriticism the spatial humanities and literary cartography help us to narrate represent and understand our place in a constantly changing world      *Geography of Education* Colin Brock, 2016-09-22 Geography of Education sets out the scope of this emergent interdisciplinary field It illustrates the essential affinity of geographical and educational studies by emphasising the geographical factors influencing formal education systems and other forms of knowledge transfer Colin Brock begins by arguing the theoretical synergy that exists between the nature of both geography and educational studies as disciplines This is then exemplified by an analysis of the emergence of systems of schooling under the influence of religious political and economic forces The author also considers informal and non formal modes of education and argues that the huge diversity of such provision creates a rich resource for research into geographies of education In the final chapters the author turns his attention to the role of cyberspace which has its own geography in learning and considers education as a form of humanitarian response to issues of environmental sustainability By bringing together a wide range of themes and topics relating to both education and geography Colin Brock argues that the geographical approach should inform the evolution of all types of educational provision around the world      *Reading and Mapping Fiction* Sally Bushell, 2020-07-02 This book explores the power of the map in fiction and its centrality to meaning from Treasure Island to Winnie the Pooh      **The Qualitative Dissertation** Maria Piantanida, Noreen B. *Cartographic Strategies of Postmodernity* Peta Mitchell, 2013-01-11 The last fifty years have witnessed the growing pervasiveness of the figure of the map in critical theoretical and fictional discourse References to mapping and cartography are endemic in poststructuralist theory and similarly geographically and culturally diverse authors of twentieth century fiction seem fixated upon mapping While the map metaphor has been employed for centuries to highlight issues of textual representation and epistemology the map metaphor itself has undergone a transformation in the postmodern era This metamorphosis draws together poststructuralist conceptualizations of epistemology textuality cartography and metaphor and signals a shift away from modernist preoccupations with temporality and objectivity to a postmodern pragmatics of spatiality and subjectivity *Cartographic Strategies of Postmodernity* charts this metamorphosis of cartographic metaphor and argues that the ongoing reworking of the map metaphor renders it a formative and performative metaphor of postmodernity

Discourse Formation in Comparative Education Jürgen Schriewer, 2009 New theories and theory based methodological approaches have found their way into Comparative Education just as into Comparative Social Science more generally in increasing number in the recent past The essays of this volume express and critically discuss quite a range of these positions such as inter alia the theory of self organizing social systems and the morphogenetic approach the theory of long waves in economic development and world systems analysis historical sociology and the sociology of knowledge as well as critical hermeneutics and post modernist theorizing With reference to such theories and approaches the chapters written by scholars from Europe the USA and Australia outline alternative research agendas for the comparative study of the social and educational fabric of the modern world In so doing they also expound frames of reference for re considering the intellectual shaping or Discourse Formation of Comparative Education as a field of study
