**Incommensurability and Cross-Language Communication** Xinli Wang, 2017-05-15 A dominant epistemological assumption behind Western philosophy is that it is possible to locate some form of commonality between languages traditions or cultures such as a common language or lexicon or a common notion of rationality which makes full linguistic communication between them always attainable Xinli Wang argues that the thesis of incommensurability challenges this

assumption by exploring why and how linguistic communication between two conceptually disparate languages traditions or cultures is often problematic and even unattainable According to Wang s presuppositional interpretation of incommensurability the real secret of incommensurability lies in the ontological set ups of two competing presuppositional languages This book provides many original contributions to the discussion of incommensurability and related issues in philosophy and offers valuable insights to scholars in other fields such as anthropology communication linguistics scientific education and cultural studies

directions in which the subject is developing It includes articles that are already recognized as classics and others which deserve to become so supplemented with editorial introductions relating the individual contributions to the field as a whole This collection of readings will be useful to students of corpus linguistics at both undergraduate and postgraduate level as well as academics researching this fascinating area of linguistics
