International Moratorium of Ten Years on the Killing of All Species of Whales United States. Congress. House. Committee on Foreign Affairs. Subcommittee on International Organizations and Movements, 1971 **Wild Blue** Dan Bortolotti, 2008-10-14 The blue whale holds the title of largest creature that has ever lived and it may also be the most mysterious The biggest blue whales can outweigh every player in Major League Baseball and the National Hockey League combined Their mouths can gulp more than thirteen thousand gallons of seawater A newborn can be over twenty feet long and gain nearly twenty tons in seven months about eight pounds per hour Blue whales emit more powerful sounds than any other animal on earth though many of their vocalizations are beyond the range of human hearing Yet nearly everything that we have learned about blue whales has come after humans almost wiped them out from the oceans A century ago some three hundred thousand roamed the seas But in the first decades of the twentieth century humans hunted and killed 99.9% of them Their numbers decimated the species seemed destined for extinction Only in recent years has the number slowly begun to increase along with hope for the blue whale's future Equal parts history and science Wild Blue is the first comprehensive portrait of the blue whale It draws upon new findings from scientists who have begun to identify individual blue whales and understand how they dive how they feed where they migrate and why they emit their haunting low frequency calls With deft

poignant writing Dan Bortolotti gives us the most vibrant breathtaking view to date of these magnificent creatures

environmental issues It is not that all whale species are at the brink of extinction but that whales have become important symbols to both pro and anti whaling factions and can easily be appropriated as the common heritage of humankind This book the first of its kind is therefore not about whales and whaling per se but about how people communicate about whales and whaling It contributes to a better understanding and discussion of controversial environmental issues Why and how are issues selected How is knowledge on these issues produced and distributed by organizations and activists And why do affluent countries like Japan and Norway still support whaling which is of insignificant economic importance Basing his analysis on fieldwork in Japan and Norway and at the International Whaling Commission the author argues how an image of a superwhale has been constructed and how this image has replaced meat and oil as the important whale commodity He concludes that the whaling issue provides an arena where NGOs and authorities on each side can unite swapping political legitimacy and building personal relations that can be useful on issues where relations are less harmonious
