OECD Reviews on Local Job Creation Policy Options for Labour Market Challenges in Amsterdam and Other Dutch Cities OECD, 2023-01-10 Labour markets across the Netherlands recovered quickly from the COVID 19 shock and Dutch cities are now facing an unprecedented level of labour market tightness The high demand for workers presents a unique opportunity for Dutch municipalities to find pathways into employment for those with the lowest labour market attachment and alleviate the pressure faced by local employers that struggle to find suitable workers

The Dynamics of Full Employment G nther Schmid, Bernard Gazier, 2002-01-01 Persistent unemployment is recognized as one of the main mechanisms of social and political exclusion The Dynamics of Full Employment provides a new and fresh approach to the question of full employment in contemporary society It offers an international *Work and Family Policy* Stephen Sweet, 2013-09-13 Numerous challenges exist in respect to integrating work and family institutions and there is remarkable cross national variation in the ways that societies respond to these concerns with policy This volume examines these concerns by focusing on cross national variation in structural cultural arrangements Consistent support is found in respect to the prospects of expanding resources for working families both in the opportunity to provide care as well as to remain

integrated in the workforce However the studies in this volume offer qualifiers explaining why some effects are not as strong as might be hoped and why effects are sometimes restricted to particular classifications of workers or families It is apparent that when different societies implement similar policies they do not necessarily do so with the same intended outcomes and usage is mediated by how policies are received by employers and workers The chapters in this book speak to the merits of international comparative analysis in identifying the strategies challenges and benefits of providing resources to workers and their families This book was originally published as a special issue of Community Work Family *Decent Flexibility* Dr Fred C. A. van Haasteren, 2017-07-30 Within the context of social law temporary agency work has always been subject of debate The pursuit of more flexible forms of labour is at odds with maintaining decent labour relations For that reason ever since it was established the UN organisation for labour issues ILO has focused on private work placement In its early years it tended to prohibit or severely restrict private work placement but gradually it came to acknowledge that for instance temporary agency work had positive aspects and that a total ban was pointless In 1997 this culminated in ILO convention 181 which was widely supported This did not end the debate on non standards forms of paid work Which forms of work can be considered decent How do they relate to human rights What are the effects of globalisation In the European context too cross border temporary agency work has attracted extensive attention Lastly the Netherlands has its own unique form of public private regulation The guiding principle in this book is whether Convention 181 still has value in this day and age What are the developments in temporary agency work in the social domain How do they relate to the wide range of flexible work forms that are increasingly catching up with temporary agency work Decent flexibility is the challenge Dr Fred van Haasteren 1949 started his career as a scientific associate at the Society and Enterprise Foundation SMO From 1978 onward he worked in the Dutch temporary agency sector In 1982 he became a board member of Randstad Nederland in 1991 he became Vice President of Randstad Holding Among other things he was also President of the platform of European temporary agency employers and of the global temporary agency employer umbrella organisation CIETT He is still a board member of the Dutch Labour Standards Foundation SNA and an independent member of the NCP OECD The social policy pursued by temporary employment agencies has always been at the centre of his activities Low-Wage Work in the Netherlands Weimer Salverda, Maarten Van Klaveren, Marc Van Der Meer, 2008-04-03 The Dutch economy has often been heralded for accomplishing solid employment growth within a generous welfare system In recent years the Netherlands has seen a rise in low wage work and has maintained one of the lowest unemployment rates in the European Union Low Wage Work in the Netherlands narrows in on the causes and consequences of this new development The authors find that the increase in low wage work can be partly attributed to a steep rise in the number of part time jobs and non standard work contracts 46 percent of Dutch workers hold part time jobs The decline in full time work has challenged historically powerful Dutch unions and has led to a slow but steady dismantling of many social insurance programs from 1979 onward At the same time there

are hopeful lessons to be gleaned from the Dutch model low wage workers benefit from a well developed system of income transfers and many move on to higher paying jobs Low Wage Work in the Netherlands paints a nuanced picture of the Dutch economy by analyzing institutions that both support and challenge its low wage workforce A Volume in the Russell Sage Foundation Case Studies of Job Quality in Advanced Economies The Oxford Handbook of Offshoring and Global Employment Ashok Bardhan,Dwight M. Jaffee,Cynthia A. Kroll,2013-04-09 The Oxford Handbook of Offshoring and Global Employment deals with a key issue of our time How do globalization economic growth and technological developments interact to impact employment The book brings together eminent authors from a wide range of countries around the world drawing on their diverse academic and policymaking backgrounds and specific national or regional settings to assess how global economic changes have affected employment opportunities The book is unique in a number of ways It has a global reach presenting analyses and viewpoints from both developed and developing countries from all continents its timing and context is particularly instructive since most papers are located in the aftermath of the global financial crisis and it addresses a wide range of questions How do different types of offshoring and global linkages impact employment How is the skill mix of the labor force impacted by globalization How do institutional structures and regulations influence the outcome of globalization in developed and developing countries Individual chapters analyze how the impact of global linkages on national economies is mediated through a number of structural aspects of the economy its institutional and industrial structure its resource base its predominant firm type its comparative advantage and its regulatory practices The chapters in the book cover both manufacturing and services sectors and many chapters also address policy issues regarding innovation and job creation **OECD Reviews of Migrant Education Closing the Gap for Immigrant Students Policies, Practice and Performance** OECD,2010-03-24 This book offers comparative data on access participation and performance of immigrant students and their native peers and identifies a set of policy options based on solid evidence of what works

The Measure of America Sarah Burd-Sharps,Kristen Lewis,Eduardo Borges Martins,2008-07-22 The Measure of America is the first ever human development report for a wealthy developed nation It introduces the American Human Development Index which provides a single measure of well being for all Americans disaggregated by state and congressional district as well as by gender race and ethnicity The Index rankings of the 50 states and 436 congressional districts reveal huge disparities in the health education and living standards of different groups Clear precise objective and authoritative this report will become the basis for all serious discussions concerning the realization of a fair just and globally competitive American society
