Mabey,2016-07-27 The main source of competitive advantage for an organisation rests in its people Many companies claim that its people are the greatest asset of the company but the evidence is that few behave accordingly Indeed when managers are appointed to new important positions such as their first general management position few receive any special training for this role The evidence is that most appointees are appointed on the basis of their track record and not through any attempt to evaluate the new position and to match the candidate s objectively measured skill base against the core competencies needed for that job This book demonstrates the many ways that the careful selection of individuals and teams can add value to the enterprise It also demonstrates that there are methods by which teams can be enhanced through utilising and understanding the diversity of the different styles of the individuals **Management Systems and Organizational Performance** Martin F. Stankard,2002-06-30 Organizations can and must be viewed as systems This may be the only means of achieving or exceeding the crucial ISO9000 standard of performance Stankard s research proves that there are ways to design management actions that will enable organizations to facilitate goal oriented performance L While evidence suggests that world class firms continuously improve their products and processes their techniques vary This book gives you a framework for understanding how all of the new management techniques even the fads fit or usually do not fit your own business and offers insight into avoiding potential business disasters Identifying an organizational revolution built on cycles of planning action learning and on a humanized scientific method Stankard shows how firms that have won the Baldrige Award for performance excellence do in fact excel in the marketplace and on Wall Street This is a unique book for middle to upper management especially in the operations information systems human resource quality assurance and strategic planning functions but also for those involved in state quality award programs nationwide For general managers of small to medium size firms or profit centers Stankard s work will be an especially useful guide to gaining a competitive edge out of ISO9000

Selling is Dead Marc Miller,Jason Sinkovitz,2012-06-29 A manifesto for reinventing the sales function *Selling Is Dead* argues that selling teams and growth motivated organizations must change to remain competitive It presents a new selling framework based on research that indicates that buyer behavior can be modeled and that large sales and small sales are fundamentally different This new framework provides salespeople with a practical structure for giving buyers significantly

more value for their dollar value well beyond the products and services being sold Rather than focusing on one selling model regardless of the type of sale this book offers four different types of large sales and presents specific strategies for succeeding at each Many sales organizations are systematically mismanaging their selling opportunities and failing to optimize their markets Through effective selling models illustrative case studies and examples and real world anecdotes Selling Is Dead brings strategy and efficiency to sales and shows every sales based business how to reap the rewards
