Slow Plague A Geography Of The Aids Pandemic:

The Slow Plague Peter R. Gould,1993-10-08 Based on research by a leading geographer and specialist in diffusion theory The Slow Plague discloses the geographic dimension of the AIDS pandemic It provides a lucid description of the HIV its origins and the extent to which it has now permeated our lives The author shows how the virus jumps from city to city creating regional epicenters from which it spreads into surrounding areas Four case studies at different geographic scales demonstrate the devastating effects of the disease In Africa the situation is catastrophic in Thailand it is rapidly becoming so In the US there are over 300 000 people with AIDS and more than one million infected by the HIV The relationships between poverty drugs and HIV infection are brought out poignantly in a chapter about the Bronx The author argues that a real understanding of AIDS has been hampered by conscious or unconscious beliefs that those affected are and will continue to be confined to specific minority groups and to parts of the Third World He shows that such views have led to fundamental misconceptions about the pattern of the spread of the disease and about those who will be most at risk now and in the immediate future

Antiblack Racism and the AIDS Epidemic A. Geary,2014-05-14 Anti Black Racism and the AIDS Epidemic State Intimacies argues that racial disparities in HIV rates reflect the organization of racialized poverty and structural violence Challenging the popular perception of HIV black vulnerability to HIV in the US is shown to be created by the violent intimacy of the state

Pandemic Kofi Atta Annan,Rory Kennedy,2003 PANDEMIC presents a 20 year retrospective of AIDS through the work of over 75 artists from 50 nations These powerful images in the photographic medium document the lives and harsh realities of people living with AIDS

AIDS Bibliography ,1994-07 **Historical Explorations of Modern Epidemiology** Heini Hakosalo,Katariina Parhi,Annukka Sailo,2023-04-10 This volume explores the history of epidemiology from the mid twentieth century to the present Epidemiology has exerted major influence on the way that both infectious and chronic diseases are conceptualized and controlled and more generally on the way that people in modern societies think about health behavior longevity and risk This collection consists of a series of in depth analyses of the roots development and impact of epidemiological research illuminating the complex relationship between medical research and data on the one hand and social and cultural factors on the other The thematical and geographical scope of the book ranges from indigenous and participant perspectives to the visualization of pandemics and from Circumpolar North to East Africa The book identifies significant historical changes and the driving forces behind them charting forms of science society interaction that characterize modern epidemiology Chapter 1 and chapter 4 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

Geographies of Sexualities Dr Gavin Brown,Dr Jason Lim,Professor Kath Browne,2012-11-28 Recent years have seen a dramatic upsurge of interest in the connections between sexualities space and place Drawing established and founding figures of the field together with emerging authors this innovative volume offers a broad interdisciplinary and international overview of the geographies of sexualities

Incorporating a discussion of queer geographies *Geographies of Sexualities* engages with cutting edge agendas and challenges the orthodoxies within geography regarding spatialities and sexualities It contains original and previously unpublished material that spans the often separated areas of theory practices and politics This innovative volume offers a trans disciplinary engagement with the spatialities of sexualities intersecting discussions of sexualities with issues such as development race gender and other forms of social difference

The Geographies of COVID-19 Melinda Laituri, Robert B. Richardson, Junghwan Kim, 2022-10-31 This volume of case studies focuses on the geographies of COVID 19 around the world These geographies are located in both time and space concentrating on both first and second order impacts of the COVID 19 pandemic First order impacts are those associated with the immediate response to the pandemic that include tracking number of deaths and cases testing access to hospitals impacts on essential workers searching for the origins of the virus and preventive treatments such as vaccines and contact tracing Second order impacts are the result of actions practices and policies in response to the spread of the virus with longer term effects on food security access to health services loss of livelihoods evictions and migration Further the COVID 19 pandemic will be prolonged due to the onset of variants as well as setting the stage for similar future events This volume provides a synopsis of how geography and geospatial approaches are used to understand this event and the emerging new normal The volume s approach is necessarily selective due to the global reach of the pandemic and the broad sweep of second order impacts where important issues may be left out However the book is envisioned as the prelude to an extended conversation about adaptation to complex circumstances using geospatial tools Using case studies and examples of geospatial analyses this volume adopts a geographic lens to highlight the differences and commonalities across space and time where fundamental inequities are exposed the governmental response is varied and outcomes remain uncertain This moment of global collective experience starkly reveals how inequality is ubiquitous and vulnerable populations those unable to access basic needs are increasing This place based approach identifies how geospatial analyses and resulting maps depict the pandemic as it ebbs and flows across the globe Data driven decision making is needed as we navigate the pandemic and determine ways to address future such events to enable local and regional governments in prioritizing limited resources to mitigate the long term consequences of COVID 19

Non-Representational Theory & Health Gavin J. Andrews, 2018-02-13 Non representational theory is an academic approach that animates the active world its taking place It shows how material sensory and affective processes combine with conscious thought and agency in the making of everyday life This book offers an agenda for health geography providing the first comprehensive overview of what a more than representational health geography looks like It outlines the basis of a new ontological understanding of health and explores the key qualities of movement space that are critical to how health emerges within the assemblages that enable it It shows how non representational events and concerns are key to human happiness and wellbeing to the experience of health and disease to activities that add to or detract from health and to health care work

not to mention to the broader initiatives and operation of health institutions and health sciences This book bridges the gap between non representational theory and health research and provides the groundwork for future developments in the field It will be of interest to students researchers and professionals alike working in health geography and a range of other disciplines

Human Ecology Markus Nauser, Dieter Steiner, 2002-11 Arguing for environmentally sustainable lifestyles this envisages a new kind of consciousness based on the notion of the individual as an agent mediating between society and the environment

Disease and Democracy Peter Baldwin, 2005 A historical masterpiece Just when we thought we knew everything about the politics and policies of the HIV AIDS pandemic Peter Baldwin surprises us with innovative insights about the sharp differences in policy among countries as well as complex tradeoffs between civil liberties and public goods This is a refreshing and readable book in which AIDS is used as a lens to understand the public health enterprise ranging from leprosy and syphilis to tuberculosis and SARS Baldwin offers a deeply historical and comparative understanding of HIV in the industrialized world Lawrence O Gostin author of Public Health Law Power Duty Restraint Although a vast literature has emerged to chronicle and reflect on the history of the AIDS epidemic since it was first reported almost a quarter of a century ago there is nothing like Peter Baldwin s probing and synthetic analysis of AIDS in the industrialized world Building on his masterful Contagion and the State in Europe 1830 1930 Baldwin has provided a complex historical tapestry of how an epidemic threat has challenged and exposed democracies that thought infectious threats a thing of the past Ronald Bayer author of Private Acts Social Consequences Aids and the Politics Of Public Health and coauthor with Gerald Oppenheimer of AIDS Doctors Voices from the Epidemic

Population Mobility and Infectious Disease Yorghos Apostolopoulos, Sevil Sonmez, 2007-05-06 Population Mobility and Infectious Disease moves beyond traditional behavioral and demographic theories of disease diffusion to focus on larger issues of social ecology and public health With depth rarely seen in the international literature it explores the complex and varied roles of mobile transient and displaced populations in the worldwide spread of airborne waterborne and sexually transmitted infections The book argues that while biomedical events cause disease social forces such as poverty and marginalization magnify them by giving them new opportunities to take hold Population mobility either voluntary or forced brings contact between populations with different disease prevalence rates outbreaks in turn are compounded by inequalities in access to medical care From Katrina to Darfur and from influenza to AIDS an expert panel of health and social scientists bring the socioeconomic context of epidemics into clear focus Historical perspectives on migration development and epidemics Social resources and health barriers among migrant groups The role of mobile labor populations e g migrant workers truckers the military in disease transmission War refugees resettlement health effects on the world scale Natural disasters and climate change their local and global disease impact Leisure travel and health risks from spring break binges to commercial sex tourism Methodological and design issues confronting researchers The politics of prevention ethical concerns in migration related illness The unique scope of this book makes it as

timely as the next health crisis and relevant to a gamut of interrelated fields including public and international health epidemiology psychology sociology anthropology human rights and development and planning By expanding concepts examining trends and pinpointing areas for intervention it is a critical resource for the academic research practice and policy sectors Infections and Inequalities Paul Farmer,2001-02-23 Annotation A report from the front lines of the war against the most deadly epidemics of our times by a physician anthropologist who has for over 15 years sought to serve the poor of rural Haiti and other settings in the Americas **Health and Inequality** Sarah Curtis,2004 By relating theoretical arguments to specific landscapes Sarah Curtis develops the basis for a geographical analysis of health problems and proposes a range of strategies for reducing disadvantage and societal inequalities **Entangled Histories and Negotiated Universals** Wolf Lepenies,2003 Entangled Histories and Negotiated Universals explores the changing field of local histories Young researchers from around the world including scholars from Canada Mozambique China and Germany representing fields as diverse as history linguistics political science anthropology medicine and materials science present their findings all of which coincide in their understanding that local histories are inseparably intertwined and that fundamentally all history is the history of relationships **Animal Spaces, Beastly Places** Chris Philo,Chris Wilbert,2004-08-02 Animal Spaces Beastly Places examines how animals interact and relate with people in different ways Using a comprehensive range of examples which include feral cats and wild wolves to domestic animals and intensively farmed cattle the contributors explore the complex relations in which humans and non human animals are mixed together Our emotions involving animals range from those of love and compassion to untold cruelty force violence and power As humans we have placed different animals into different categories according to some notion of species usefulness domesticity or wildness As a result of these varying and often contested orderings animals are assigned to particular places and spaces Animal Spaces Beastly Places shows us that there are many exceptions and variations on the spatiality of human animal spatial orderings within and across cultures and over time It develops new ways of thinking about human animal interactions and encourages us to find better ways for humans and animals to live together Doctors in a Strange Land Leonard David Baer,2002-01-01 Doctors in a Strange Land provides an in depth analysis of rural America s reaction to and acceptance of the international medical graduates who have come to live and work in their towns Leonard Baer s study draws on case studies of two small rural communities to identify who the immigrant physicians are and investigate how well they have been received His research findings reveal complex issues of race gender religion and language that are of great significance to the ongoing national debate about the place of immigrant physicians The Fourth Wave Jennifer Klot,Vinh-Kim Nguyen,2011-01-01 *Geomed '97* Lothar Gierl,Andrew Cliff,Alain-Jacques Valleron,Paddy Farrington,Mathias Bull,2012-12-06 A key event in the development of modern epidemiology was the discovery by the English physician John Snow that cholera is transmitted by contaminated water During the cholera epidemic in London in 1854 Snow mapped the

locations of cholera deaths observed a cluster of victims in a particular neighbourhood and found that most of these cases had drunk water from a communal water pump The handle of the pump was removed at Snow s insistence and the epidemic ended within a few days Since these early days the science of epidemiology has grown into a major discipline with many successes to its credit Many of the diseases which wreaked havoc in the last century have been brought under control and in the case of smallpox eliminated through improvements in hygiene and the use of preventive and control measures such as mass vaccination Nevertheless in recent years new problems have emerged and old diseases have re emerged Many foodborne and waterborne disease outbreaks go unrecognized or are detected too late for effective control measures to be implemented New infections such as HIV present new threats Antimicrobial drug resistance particularly the increase in drug resistant TB also poses new challenges
