Acs, Bernard Yin Yeung, 2010-08-10 Entrepreneurship and globalization are two much examined forces as we enter the new millennium yet very little has been published on the intersection of small and medium sized enterprises SMEs and the global economy To close the gap this volume delves into the intricate roles and consequences of such businesses on both global and domestic economies The first part of the volume provides an overview of the phenomenon of globalization arguing that entrepreneurial discovery and technological change lead to globalization which in turn leads to further opportunity for entrepreneurial discovery no less for SMEs than for multinational corporations In part two the essays examine the role of SMEs in the global economy and why they are thriving Part three reviews the roles of SMEs and innovators and examines their roles in direct foreign investment Part four explores the role of technological diversity and knowledge spillovers as a way to explain the superior innovative performance of SMEs Part five looks at the role of SMEs in technology transfer Finally part six examines the theoretical and policy implications of the international activities of SMEs suggesting that policies should aim to reduce the costs in international expansion for SMEs This volume will provide the foundation for further study in SMEs and globalization It will appeal to scholars and students in both international business and economics Zoltan J Acs is Professor of Economics and Finance University of Baltimore Bernard Yin Yeung is Professor of International Business University of Michigan
