Boggs Lawrence Weschler, 2000-11-15 Boggs A Comedy of Values teases out these transactions and their sometimes dramatic legal consequences following Boggs on a larkish though at the same time disconcertingly profound economic philosophic chase For in a madcap Socratic fashion Boggs is raising all sorts of truly fundamental questions what is it that we value in art or for that matter in money Indeed how do we place a value on anything at all And in particular why do we why should we how can we place such trust in anything as confoundingly insubstantial as paper money

Collecting the Now Michael Maizels, 2022-08-09 Collecting the Now offers a new in depth look at the economic forces and institutional actors that have shaped the outlines of postwar art history with a particular focus on American art 1960 1990 Working through four case studies Michael Maizels illuminates how a set of dealers and patrons conditioned the iconic developments of this period the profusions of pop art the quixotic impossibility of land art the dissemination of new media and the speculation fueled neo expressionist painting of the 1980s This book

addresses a question of pivotal importance to a swath of art history that has already received substantial scholarly investigation We now have a clear nuanced understanding of why certain evolutions took place why pop artists exploded the delimited parameters of aesthetic modernism why land artists further strove against the object form itself and why artists returned to neo traditional painting in the 1980s But remarkably elided by extant scholarship has been the question of how How did conditions coalesce around pop so that its artists entered into museum collections and scholarly analyses at pace unprecedented in the prior history of art How when seeking to transcend the delimited gallery object were land artists able to create monumental and by extension monumentally expensive interventions in the extreme wilds of the Western deserts And how did the esoteric objects of media art come eventually to scholarly attention in the sustained absence of academic interest or a private market The answers to these questions lie in an exploration of the financial conditions and funding mechanisms through which these works were created advertised distributed and preserved **Pedigree and Panache**

Octavian Esanu,2021-11-23 The postsocialist contemporary joins a growing body of scholarship debating the definition and nature of contemporary art It comes to these debates from a historicist perspective taking as its point of departure one particular art programme initiated in Eastern Europe by the Hungarian American billionaire George Soros First implemented in Hungary the Soros Center for Contemporary Art SCCA expanded to another eighteen ex socialist countries throughout the 1990s Its mission was to build a western open society by means of art This book discusses how network managers and artists participated in the construction

of this new social order by studying the programme's rise, evolution, impact and broader ideological and political consequences. Rather than recounting a history, it engages critically with contemporary art as the aesthetic paradigm of late capitalist market democracy.
