Smokescreen Philip J. Hilts, 1996 Cigarettes smoking intrigue and a troubling look at the abuses of corporate power

Smoke Screen Philip J. Hilts, 1996-10-01 A full expose of the tobacco industry's 40 year war on the health of every American. The secrets, denials, delaying tactics and outright lies that the tobacco industry has foisted on us all are documented in this by turns shocking, fascinating and infuriating page turner as Hilts unravels what may be the most deceitful and deadly marketing campaign in history. Cuts right to the heart of what has enraged the American public: the clearest statement he heard from RJR executives came in a Q & A period at a sales meeting. Someone asked who the youngsters were that were being targeted: jr high school kids or younger. The reply: They got lips. We want 'em. [Health Services Reports](#), 1996 [Public Health Reports](#), 2001 **Industrial-Strength Denial** Barbara Freese, 2021-05-04 How corporate denial harms our world and continues to threaten our future. Corporations faced with proof that they are hurting people or the planet have a long history of denying evidence, blaming victims, complaining of witch hunts, attacking their critics' motives and otherwise rationalizing their harmful activities. Denial campaigns have let corporations continue dangerous practices that cause widespread suffering, death and environmental destruction. And by undermining social trust in science and government, corporate denial has made it harder for our democracy to function. Barbara Freese, an environmental attorney, confronted corporate denial years ago when cross-examining coal industry witnesses who were disputing the science of climate change. She set out to discover how far from reality corporate denial had led society in the past and what damage it had done. Her resulting deeply researched book is an epic tour through eight campaigns of denial waged by industries defending the slave trade, radium consumption, unsafe cars, leaded gasoline, ozone-destroying chemicals, tobacco, the investment products that caused the financial crisis and the fossil fuels destabilizing our climate. Some of the denials are appalling: slave ships are festive. Some are absurd: nicotine is not addictive. Some are dangerously comforting: natural systems prevent ozone depletion. Together they reveal much about the group dynamics of delusion and deception. **Industrial Strength Denial** delves into the larger social dramas surrounding these denials, including how people outside the industries fought back using evidence and the tools of democracy. It also explores what it is about the corporation itself that reliably promotes such denial, drawing on psychological research into how cognition and morality are altered by tribalism, power, conflict, anonymity, social norms, market ideology and, of course, money. **Industrial Strength Denial** warns that the corporate form gives people tremendous power to inadvertently cause harm while making it especially hard for them to recognize and feel responsible for that harm.

How Tobacco Smoke Causes Disease United States. Public Health Service. Office of the Surgeon General, 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies Mechanisms of disease are important because they may provide plausibility which is one of the guideline criteria for assessing evidence on causation This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke This evidence is relevant to understanding how smoking causes disease to identifying those who may be particularly susceptible and to assessing the potential risks of tobacco products

The Cigarette Century Allan M. Brandt, 2009-01-06 The invention of mass marketing led to cigarettes being emblazoned in advertising and film deeply tied to modern notions of glamour and sex appeal It is hard to find a photo of Humphrey Bogart or Lauren Bacall without a cigarette No product has been so heavily promoted or has become so deeply entrenched in American consciousness And no product has received such sustained scientific scrutiny The development of new medical knowledge demonstrating the dire harms of smoking ultimately shaped the evolution of evidence based medicine In response the tobacco industry engineered a campaign of scientific disinformation seeking to delay disrupt and suppress these studies Using a massive archive of previously secret documents historian Allan Brandt shows how the industry pioneered these campaigns particularly using special interest lobbying and largesse to elude regulation But even as the cultural dominance of the cigarette has waned and consumption has fallen dramatically in the U S Big Tobacco remains securely positioned to expand into new global markets The implications for the future are vast 100 million people died of smoking related diseases in the

20th century in the next 100 years we expect 1 billion deaths worldwide *Distorting the Law* William Haltom, Michael McCann, 2009-11-15 In recent years stories of reckless lawyers and greedy citizens have given the legal system and victims in general a bad name Many Americans have come to believe that we live in the land of the litigious where frivolous lawsuits and absurdly high settlements reign Scholars have argued for years that this common view of the depraved ruin of our civil legal system is a myth but their research and statistics rarely make the news William Haltom and Michael McCann here persuasively show how popularized distorted understandings of tort litigation or tort tales have been perpetuated by the mass media and reform proponents *Distorting the Law* lays bare how media coverage has sensationalized lawsuits and sympathetically portrayed corporate interests supporting big business and reinforcing negative stereotypes of law practices Based on extensive interviews nearly two decades of newspaper coverage and in depth studies of the McDonald's coffee case and tobacco litigation *Distorting the Law* offers a compelling analysis of the presumed litigation crisis the campaign for tort law reform and the crucial role the media play in this process *Fake News Nation* James W. Myths of the Free Market Kenneth S. Friedman, 2003 Myths of the Free Market is arguably the most significant book in economics and politics since John Maynard Keynes It systematically presents a broad range of telling criticisms of free market economics criticisms that have not been presented elsewhere Despite our genuine faith in the free market laissez faire has not maximized wealth When we moved from the purer free market policies of the 1920s and early 1930s to the proto socialism of Roosevelt our economic growth increased As we have moved back to a purer free market growth has slowed We have lagged our trading partners who have mixed economies Nor is this new In the late 1800s the mixed economies of Bismarck s Germany and Meiji Japan outperformed the relatively free market economies of Great Britain and France It is worse Even in principle laissez faire cannot work it is incompatible with institutions that increase wealth Patent protection is one example easily generalized It is worse yet Laissez faire promotes the excessive concentration of wealth and exposes us all to avoidable danger Over the last millennium there has been a 200 300 year cycle of wealth dispersion Each time wealth disparity grew beyond a critical point it presaged decline and disaster for all of society We now have the greatest disparity of wealth in our history Kenneth Friedman holds an MS in Physics and PhD in Philosophy of Science from MIT He has been interviewed in Barron s and on CNBC and quoted in The Wall Street Journal **Health Psychology** Regan A. R. Gurung, 2018-08-29 Health Psychology Well Being in a Diverse World introduces students to the main topics and issues in health psychology through a unique perspective focused on diversity Using a conversational tone author Regan A R Gurung explores the key determinants of behavior such as family environment ethnicity and religion and connects concepts to personal experiences for students to gain a deeper understanding and appreciation of the material Extensively updated based on over 1 000 new articles cited and with a new chapter on research methods the Fourth Edition reflects the latest cutting edge research in the field to explain more thoroughly how context and culture are important predictors of healthy behavior

Environmental Justice Kristin Shrader-Frechette, 2002-09-26 Shrader Frechette offers a rigorous philosophical discussion of environmental justice Explaining fundamental ethical concepts such as equality property rights procedural justice free informed consent intergenerational equity and just compensation and then bringing them to bear on real world social issues she shows how many of these core concepts have been compromised for a large segment of the global population among them Appalachians African Americans workers in hazardous jobs and indigenous people in developing nations She argues that burdens like pollution and resource depletion need to be apportioned more equally and that there are compelling ethical grounds for remedying our environmental problems She also argues that those affected by

environmental problems must be included in the process of remedying those problems that all citizens have a duty to engage in activism on behalf of Environmental Justice and that in a democracy it is the people not the government that are ultimately responsible for fair use of the environment
