Abstract: Smoking behaviour has a harmful impact on teenagers, including the lack of motivation to achieve academically. Previous research claims that the perception of smoking and the motivation to quit smoking may impact smoking behaviour. The purpose of the research is to identify which one of both variables play a stronger role in its impact toward the teenager's smoking behavior. The research is a quantitative research involving 192 teenagers as the sample in Bandung city, using questionnaires on perception, motivation, and behavior. Data analysis used univariate and bivariate and Spearman correlation tests. The findings of this research shows that 56% of Bandung teenagers have a positive perception, 51% others a positive motivation, and 56% positive behaviour. This proves that the coefficient value of the correlation between perception and motivation is 0.238, and the coefficient value of the correlation between motivation and behavior is 0.387. This research concludes that the motivation to quit smoking has a stronger relationship than the perception of smoking. Thus, to change the smoking behaviour in teenagers, it is necessary to increase the motivation to quit smoking whatsoever. Possible actions is to have a counselling session to help change the teenager's health behaviour. The value of study to obtain the unique characteristic of teenager in Indonesia.

Keywords: motivation to quit smoking; smoking behavior; smoking perception

1. Introduction

Adolescence is a transitional period from childhood to adulthood; at this stage, some emotional and behavioral turbulence are identified, one of which is smoking problems (Chadds, 2014). Based on the research from Azagba and Wolfson (2018) the quantity and frequency of smoking can be considered high and categorized as heavy smokers, including electronic smokers.

The data from World Health Organization (WHO) (2018) claim that the number of smokers above 15 years old in 2015 is 1.114 million, consisting of 939 million male and 175 million other females. In Asia, there are 237 million smokers, slightly higher than the number in the last 5 years, which is 235 million in 2010. Out of all Asian countries, Indonesia has the second highest number of smokers after India. According to WHO (2018), Indonesia has 74 million smokers in 2016 (71.637 million male and

Behavioral Methods in Social Welfare Steven Paul Schinke, James. K Whittaker, Scott Briar, 2017-09-08 *Behavioral Methods in Social Welfare* offers positive proof that behaviorism has come of age in social work Steven Paul Schinke and the contributors to this volume are social work practitioners who document their attempts to extend the basic tenets of behavioral psychology from the laboratory clinic and classroom to the full range of client groups and social problems that

make up the practice of social work In social work education traditionally to the extent it appeared in the curriculum at all behavioral content appeared in electives or in courses not focused on practice It is a true measure of progress that behavioral methods are now visible integral component of social work education and practice The authors of each piece in this collection indicate progress in developing an empirically based approach to social work practice Despite the impressive documentation contained in the present volume no conclusive evidence as to the effectiveness of behavioral methods exists What behavioral methods do offer however is a systematic format for both problem intervention and evaluation that over time should produce a more empirically based practice A promising sign well documented in the present effort is the facility with which this book has subjected practice procedures to the rigor of research and evaluation This blending of clinical practice and research develops the sense of competence that student practitioners acquire in understanding and controlling both the art and science of their clinical practice Steven Schinke and his colleagues offer a series of snapshots of important work in process Their collective portrait provides a fresh perspective and new stimulus for all social work practice as well as an affirmation that disciplined responsive and sensitive social work intervention can make a difference in the lives of people

Ethanol, Its Active Metabolites, and Their Mechanisms of Action: Neurophysiological and Behavioral Effects Elio Acquas, John D. Salamone, Mercè Correa, 2018-07-12 Ethanol the main psychopharmacologically active ingredient of alcoholic drinks represents a paradigmatic example of a research subject intrinsically able to perpetually self generate interdisciplinary cutting edge investigations This eBook was inspired by the aim of providing an up to date characterization of the diverse effects of ethanol of the possible mechanisms of action on different intracellular systems as well as of the hypothesized actions of ethanol and or its metabolites on various neurotransmitters and neuromodulators Indeed the eBook provides a factual example of an excellent synthesis on the complex relationship between ethanol and its main biologically active metabolites Chapter 1 on the behavioral and molecular consequences of early exposure to them Chapter 2 on the recent proposals advanced by the preclinical research for new therapeutic approaches to distinct aspects of alcoholism Chapter 3 and on the most recent and original preclinical evidence of the interactions between ethanol and or its metabolites and the dopaminergic adenosinergic and endocannabinoidergic systems Chapter 4 Overall we believe that this eBook accomplishes its main goals of widening the perspective on this research subject and offering the readership a newer and simultaneously up to date and comprehensive scenery on ethanol s and ethanol s active metabolites neurophysiological and behavioral effects Health and Well-Being in Adolescence Maria Kaczmarek, 2011-06-30 Health Psychology Jane
