Polyurethane Shape Memory Polymers W.M. Huang,Bin Yang,Yong Qing Fu,2011-09-08 Shape memory polymers SMPs are some of the most important and valuable engineering materials developed in the last 25 years These fascinating materials demonstrate remarkably versatile properties including capacity for actuation and stimulus responsiveness that are enabling technologists to develop applications used to explore everything from the outer reaches of space to the inside of the human body Polyurethane Shape Memory Polymers details the fundamentals of SMP makeup as well as their shape recovery features and their seemingly endless potential for use in applications ranging from the macro to submicron scales With an abundance of illustrations and vivid pictures to explain how SMPs and their composites work and how they can be used this book covers History and most recent developments in SMPs Thermomechanical properties and behavior of the polymers and their composites Modification of SMPs and novel actuation mechanisms Large scale surface pattern generation Multi shape memory effect Fabrication techniques Characterization of composites A must have reference for anyone working in the materials science and engineering fields this book outlines the properties such as light weight low cost and ability to handle high strain that make the easily processed SMPs so useful in fields including aerospace biomedicine and textiles It is intended to help readers understand and apply the knowledge and techniques presented to develop new innovations that will further benefit society

Multifunctional Polymer Nanocomposites Jinsong Leng,Alan Kin-tak Lau,2010-12-21 The novel properties of multifunctional polymer nanocomposites make them useful for a broad range of applications in fields as diverse as space exploration bioengineering car manufacturing and organic solar cell development just to name a few Presenting an overview of polymer nanocomposites how they compare with traditional composites and th

Sound-Emotion Interaction in Poetry Reuven Tsur,Chen Gafni,2022-06-03 This book is a collection of studies providing a unique view on two central aspects of poetry sounds and emotive qualities with emphasis on their interactions The book addresses various theoretical and methodological issues related to topics like sound symbolism poetic prosody and voice quality in recited poetry The authors examine how these sound related phenomena contribute to the generation of emotive qualities and how these qualities are perceived by readers and listeners The book builds upon Reuven Tsur s theoretical research and supplements it from an experimental angle It also

engages in methodological debates with prevalent scientific approaches In particular it emphasises the importance of proper theory in empirical literary studies and the role of the personal traits of the reader in literary analysis The intended readership of this book consists mainly of literary scholars but it might also appeal to researchers from disciplines such as linguistics psychology and brain science

Interactions between Electromagnetic Fields and Matter
Karl-Heinz Steiner,2016-07-29 Interactions between Electromagnetic Fields and Matter deals with the principles and methods that can amplify electromagnetic fields from very low levels of signals This book discusses how electromagnetic fields can be produced amplified modulated or rectified from very low levels to enable these for application in communication systems This text also describes the properties of matter and some phenomenological considerations to the reactions of matter when an action of external fields results in a polarization of the particle system and changes the bonding forces existing in the matter This book considers the above phenomena in detail by explaining matter as a conglomeration of charged mass points in the electromagnetic field Quantum mechanics and Maxwell s theory can then account for the precise description of the interactions between the electromagnetic fields and matter This book then describes special processes such as 1 the static and quasistatic interactions and 2 dynamic processes particularly the resonance process This text also defines a general form for electric and magnetic reactions using the generalized field equation This book also cites the anharmonic oscillator and the single spin as different examples of electric and magnetic dipole interactions This text is suitable for electrical engineers radio technicians physicists whose work is in quantum mechanics and engineers interested in electro magnetism theory

Mixed Reality and Human-Robot Interaction Xiangyu Wang, 2011-02-24 MR technologies play an increasing role in different aspects of human robot interactions The visual combination of digital contents with real working spaces creates a simulated environment that is set out to enhance these aspects This book presents and discusses fundamental scientific issues technical implementations lab testing and industrial applications and case studies of Mixed Reality in Human Robot Interaction It is a reference book that not only acts as meta book in the field that defines and frames Mixed Reality use in Human Robot Interaction but also addresses up coming trends and emerging directions of the field This volume offers a comprehensive reference volume to the state of the art in the area of MR in Human Robot Interaction an excellent mix of contributions from leading researcher experts in multiple disciplines from academia and industry All authors are experts and or top researchers in their respective areas and each of the chapters has been rigorously reviewed for intellectual contents by the editorial team to ensure a high quality This book provides up to date insight into the current research topics in this field as well as the latest technological advancements and the best working examples

Plant-Metal Interactions Sudhakar Srivastava, Ashish K. Srivastava, Penna Suprasanna, 2019-07-26 Metal toxicity and deficiency are both common abiotic problems faced by plants While metal contamination around the world is a critical issue the bioavailability of some essential metals like zinc Zn and selenium Se can be seriously low in other locations The list of metals spread in high concentrations in soil water and air includes several toxic as well as essential elements such as arsenic As cadmium Cd chromium Cr aluminum Al and selenium Se The problems for some metals are geographically confined while for others they are widespread For instance arsenic is an important toxic metalloid whose contamination in Southeast Asia and other parts of world is well documented Its threats to human health via food consumption have generated immense interest in understanding plants responses to arsenic stress Metals constitute crucial components of key enzymes and proteins in plants They are important for the proper growth and development of plants In turn plants serve as sources of essential elements for humans and animals Studies of their physiological effects on plants metabolism have led to the identification of crucial genes and proteins controlling metal uptake and transport as well as the sensing and signaling of metal stresses Plant Metal Interactions sheds light on the latest development and research in analytical biology with respect to plant physiology More importantly it showcases the positive and negative impacts of metals on crop plants growth and productivity

Lecture Notes In Global-local Policy Interactions Ariel Dinar, 2022-04-07 Globalization and recent developments in the world suggest strong relationships between local and global decisions actions and impacts Global local relationships are also associated with positive and negative externalities which necessitate policy interventions Lecture Notes in Global Local Policy Interactions discusses the

The CHORCH Approach: How to Model B2Bi Choreographies for Orchestration

Execution Andreas Schönberger,2012 The establishment and implementation of cross organizational business processes is an implication of today s market pressure for efficiency gains In this context Business To Business integration B2Bi focuses on the information integration aspects of business processes A core task of B2Bi is providing adequate models that capture the message exchanges between integration partners Following the terminology used in the SOA domain such models will be called choreographies in the context of this work Despite the enormous economic importance of B2Bi existing choreography languages fall short of fulfilling all relevant requirements of B2Bi scenarios Dedicated B2Bi choreography standards allow for inconsistent outcomes of basic interactions and do not provide unambiguous semantics for advanced interaction models In contrast to this more formal or technical choreography languages may provide unambiguous modeling semantics but do not offer B2Bi domain concepts or an adequate level of abstraction Defining valid and complete B2Bi choreography models

becomes a challenging task in the face of these shortcomings At the same time invalid or underspecified choreography definitions are particularly costly considering the organizational setting of B2Bi scenarios Models are not only needed to bridge the typical gap between business and IT but also as negotiation means among the business users of the integration partners on the one hand and among the IT experts of the integration partners on the other Misunderstandings between any two negotiation partners potentially affect the agreements between all other negotiation partners Fast Methods for
