Sustainable Peace The Role Of The U N And Regional Organizations In Preventing Conflict:

Sustainable Peace Connie Peck, 1998 The end of the twentieth century saw the easing of East West tension but not the end of violent conflict_ especially within states There has been growing consensus that the international community needs to find more effective ways of preventing such internal conflicts This book argues that the most sustainable means of promoting peace within states is the development of good governance which can address the root causes of conflict and meet basic human security needs Good governance offers groups a voice in resolving grievances at an early stage before they grow into major problems safeguards human rights and promotes a fairer distribution of resources The author suggests that the focus of good international and regional governance should be the promotion of more effective national and local governance and she outlines the efforts of the United Nations regional organizations_ such as the Organization for Security and Cooperation in Europe the Organization of African Unity and the Organization of American States_ and NGOs such as the Carter Center The most successful approaches of these organizations could be applied through proposed Regional Centers for Sustainable Peace

The Prevention and Intervention of Genocide Samuel Totten, 2017-09-08 Over the last twenty years the world has witnessed four major genocides There was the genocide in Iraq 1988 in Rwanda 1994 in Srebrenica 1995 and in Darfur 2003 and continuing Most observers agree there is an urgent need to assess the international community s efforts to prevent genocide and to intervene once a genocide is under way in an effective and timely manner This volume the latest in a widely respected series on the subject of genocide provides an overview of a host of issues germane to this task The book begins with a cogent discussion of the issues of prevention and intervention during the Cold War years The second chapter discusses the abject failures and moderate though in some cases highly controversial successes at prevention and intervention carried out in the 1990s and early 2000s Further chapters examine latest efforts to develop an effective genocide early warning system and examine the complexity of and barriers to prevention The pros and cons of sanctions and the problems of enforcement and evaluation their effectiveness are then discussed Conflicts between state sovereignty and the protection of threatened populations are examined both in historical context and by incorporating the latest thinking Later chapters treat the issue of intervention why and how it has met with only limited success Concentrating on Rwanda and Srebrenica chapter 8 discusses various peace operations that were abject failures and those that were moderately successful The concept of an anti genocide regime is examined in terms of progress in developing such a regime as well as what the international community must do in order to implement it Chapters discuss key issues related to post genocidal periods those that need to be addressed in order to establish stability in a wounded land and populace as well as to prevent future genocides The final chapter asks whether bringing perpetrators to justice has any impact in breaking impunity ensuring deterrence and bringing about reconciliation The contributors to the volume are all noted scholars some of whom specialize in the study of genocide and others who specialize in such areas as early warning peacekeeping and sanctions

Turkey's Kurdish Question Henri J.

Barkey, Graham E. Fuller, 2000-01-01 The Kurds one of the oldest ethnic groups in the Middle East are reasserting their identity politically and through violence Divided mainly among Turkey Iran Iraq and Syria the Kurds have posed increasingly sharp challenges to all of these states in their quest for greater autonomy if not outright independence Turkey's essentially democratic structure and civil society_ideal tools for coping with and incorporating minority challenge_have so far been suspended on this issue which the government is treating almost exclusively as a security problem to be dealt with by force For the West the situation in Turkey is particularly significant because of the country's importance in the region and because of the economic political and diplomatic damage that the conflict has caused If Turkey fails to find a peaceful solution within its current borders then the outlook is grim for ethnic and separatist challenges elsewhere in the region This study explores the roots dimensions character and evolution of the problem offers a range of approaches to a resolution of the conflict and draws broader parallels between the Kurdish question and other separatist movements worldwide Opportunities Missed, Opportunities Seized Bruce W. Jentleson, 2000 The basic logic of preventive diplomacy is unassailable Act early to prevent disputes from escalating reduce tensions that could lead to war deal with today's conflicts before they become tomorrow's crises Yet as we look at the record of these first years of the post Cold War era it is quite mixed There have been some preventive diplomacy successes and opportunities that have been seized by major powers and international organizations to help preserve and protect the peace But there also have been other opportunities that have been missed with some of the century's most deadly conflicts the result This study examines ten major post Cold War cases including Croatia Bosnia Rwanda the Baltics Russia Ukraine Macedonia and North Korea_to assess the key factors contributing to both the success and failure of preventive diplomacy The method of case study analysis employed is based on the work of Alexander L George Authors include both leading academics and prominent policy officials with first hand knowledge **Preventing Genocide** David A. Hamburg, 2015-11-17 Genocide has been called a problem from hell and despite vehement declarations of never again it's a problem that continues to plague the world From the beginning of history to the most recent massacres in Bosnia Rwanda and Darfur genocide defies resolution And given today's worldwide access to highly lethal weapons and advanced communications technology facilitating incitement to hate we can expect to see this problem grow It is often claimed that genocide occurs without warning taking both local and global communities by surprise Yet as David Hamburg convincingly shows we have had long term advance knowledge of most modern genocides dating back to the early 20th century Armenian tragedy in Turkey and before In this book Dr Hamburg applies a groundbreaking new perspective the medical model of prevention to the scourge of genocide in the world Preventing genocide is not only possible Dr Hamburg contends but essential given its high cost in lives human rights and international security Here he maps out numerous practical steps to recognise genocidal conflicts early and stem their tides of violence before they become acute He also outlines several institutions in place and programs underway at the UN EU and NATO devoted to preventing future genocides before they

erupt He draws lessons both from missed opportunities and successful experiences and makes many constructive suggestions about strengthening international institutions governments and NGOs for this purpose Limiting Institutions? James Sperling, Sean Kay, S. Victor Papacosma, 2003-10-03 Eurasian security governance has received increasing attention since 1989 The North Atlantic Treaty Organisation the institution that best served the security interests of the West in its competition with the Soviet Union is now relatively ill equipped resolve the threats emanating from Eurasia to the Atlantic system of security governance This book investigates the important role played by identity politics in the shaping of the Eurasian security environment It investigates both the state in post Soviet Eurasia as the primary site of institutionalisation and the state s concerted international action in the sphere of security This investigation requires a major caveat state centric approaches to security impose analytical costs by obscuring substate and transnational actors and processes The terrorist attacks on the World Trade Center and the Pentagon marked the maturation of what had been described as the new terrorism Jervis has argued that the western system of security governance produced a security community that was contingent upon five necessary and sufficient conditions The United States has made an effort to integrate China Russia into the Atlantic security system via the Partnership for Peace PfP programme and the Euro Atlantic Partnership Council The Black Sea Economic Cooperation has become engaged in disseminating security concerns in fields such as environment energy and economy If the end of the Cold War left America triumphant Russia s new geopolitical hand seemed a terrible demotion Successfully rebalancing the West and building a collaborative system with Russia China Europe and America probably requires more wisdom and skill from the world s leaders *Conflict Prevention from Rhetoric to Reality* Albrecht Schnabel, David Carment, 2004-01-01 Together with local actors many governments regional organizations and the UN are embracing preventive action as a viable path towards sustainable peace The contributions to this volume trace conflict prevention efforts in various regional contexts and explain how preventive thinking is being successfully mainstreamed into the activities of regional organizations and the UN **A Model of Prevention** David A. Hamburg, 2015-11-17 An autobiography of a ground breaking medical doctor Dr David A Hamburg started as a medical student with interest in stress disorders paying special attention to the propensity toward violence including the evolution of human aggression This lead him on a path to becoming one of the most highly celebrated doctors in America he was a member of President Clinton s Committee of Advisors on Science and Technology and was awarded the Presidential Medal of Freedom the highest civilian award of the United States Most recently he chaired committees at the United Nations and European Union on the prevention of genocide This book will be inspirational for emerging scientists today Preventing Deadly Conflict David A. Hamburg, 1998-06 *Music, Business and Peacebuilding* Constance Cook Glen, Timothy L. Fort, 2021-12-21 Business schools are placing more emphasis on the role of business in society Top business school accreditors are shifting to mandating that schools teach their students about the social impact of business including AACSB standards to require the incorporation of

business impact on society into all elements of accredited institutions Researchers are also increasingly focused on issues related to sustainability but in particular to business and peace as a field A strong strain of scholarship argues that ethics is nurtured by emotions and through aesthetic quests for moral excellence The arts and music as shown specifically in this book can be a resource to nudge positive emotions in the direction toward ethical behavior and logically then toward peace Business provides a model for positive interactions that not only foster long term successful business but also incrementally influences society This book provides an opportunity for integration and recognition of how music and other art forms can further encourage business toward the direction of peace while business provides a platform for the dissemination and modeling of the positive capabilities of music toward the aims of peace in the world today The primary market for this book is the academic audience Unlike many other academic books however the interdisciplinary nature of the book allows for multiple academic audiences Thus this book reaches into schools of music business political science film studies sports and society studies the humanities ethics and of course peace studies
