Svec 2001 9 Sites Of The Spectator:

Sites of the Spectator Suzanne Rodin Pucci, 2001 The Spectator is a major figure of the French Enlightenment whose far reaching significance has not been fully grasped As a basic organising principle of culture production in France of the early and mid eighteenth century the Spectator is an intermediary figure residing between the ancien r gime and France of the Revolution This transitional moment can be read in and furthermore was prepared by the emergence of several new literary genres in which paradoxically a Spectator was allotted the principle role This study traces the process in which the king s disenfranchised subjects at first limited merely to looking on at the spectacle of royal authority and privilege began to evolve through versatile Spectator roles into citizen subjects Each of four chapters reveals the significance of these figures to the development of a particular genre or disciplinary formation Spectator journalism art criticism fiction of voyage and the exotic and alternative popular theater the th tre de la joie These genres designate the Spectator as constituting the narrative thematic textual focus that articulates contemporary life foreign exotic cultures art objects and knowledge itself In the shift from a silent near invisible audience to a more active more sharply delineated entity of Spectators for whom and in function of whom not only literary and social production but the monarchy itself were increasingly obliged to perform a vital and as yet untold story of early and mid eighteenth century culture is recounted

The Eighteenth Century American Society for Eighteenth-Century Studies, Jim Springer Borck, 2006-12 This 17th volume from the series of bibliographies of the 18th century is divided into sections on printing and bibliographic studies historical social and economic studies philosophy science and religion the fine arts literary studies and individual authors

Word and Image in the Long Eighteenth Century Christina Ionescu, Renata Schellenberg, 2008 Interrelated by a common thread which is the emphasis on the interdependence of literature and the visual arts the essays selected for this collection illustrate how eighteenth century specialists approach word and image studies today In addition to highlighting various concepts and concerns of particular pertinence to current scholarship these studies also serve the important practical function of sensitising the reader to both the possibilities and limitations of this sort of interdisciplinary undertaking Without foregrounding the visual these contributions aim to look at verbal visual interaction through the prism of equality and balance that marks word and image studies that is without valorising one to the detriment of the other The choice of images as objects of study reflects the democratisation of the visual domain advocated by visual culture studies from theatre iconography and painted portraits of actors to drawing books and educational prints graphic satire and royal portraiture conversation pieces and domestic interiors literary illustrations and versified prints after well known paintings and engravings commissioned for calendars and periodicals If the choice of images is inclusive and diverse so is the choice of texts epistolary novels conduct manuals Salon criticism plays drawing books pamphlets historical writings verses accompanying engravings and satirical prints are among those examined from a word and image perspective The primary objective of this collection is to advance research in the field

imagination and foregrounds the imaginary at a time when Enlightenment rationalism and Classical aesthetics contrived to delimit the imagination The book unravels scholarly writing on these Fragonard paintings and examines the history of the fantasy figure from early modern Europe to eighteenth century France Emerging from this background is a view of Fragonard turning away from the academically sanctioned invention towards more playful variants of the imaginary fantasy and caprice Melissa Percival demonstrates how fantasy figures engage both artists and viewers allowing artists to unleash their imagination through displays of virtuosity and viewers to use their imagination to explore the paintings unusual juxtapositions and humour *MLA International Bibliography of Books and Articles on the Modern Languages and Literatures* ,2006
