The Nature of Business Transformation Richard Kelly, 2022-03-17 This book is a practical guide for business professionals to develop and improve business intelligence and collective decision-making within their organisation. It proposes a progressive reconfiguration of the traditional business operating system using a nature-inspired framework called swarm facilitation that enables and facilitates collective decision-making. Organisations have followed the same rigid formula of problem-solving and decision-making for over 100 years. It is dominated by centralised governance and pyramid decision-making. Such an approach is no longer fit for purpose in an environment of employee disengagement, artificial intelligence, AI, superintelligence, and Covid-19 fallout. By the end of this book, readers will be able to solve organisational problems and challenges collectively using swarm intelligence, upgrade and future-proof business operating systems to reflect a more collective decision-making approach fit for the new connected economy, and Industry 4.0 embrace mindsets that support people working in a more networked, self-organising, and collective environment. The book is important reading for leaders and managers who are focused on building organisational capital and

engagement and gaining value from the emerging technology by evolving their business operating system into a digital ecosystem as part of an ongoing digital transformation strategy It will also appeal to experts working in the field of organisational change and development both within the organisation and as consultants *Bainite in Steels* H.K.D.H.
