Communication in Construction Teams Stephen Emmitt, Christopher Gorse, 2006-09-27 Construction teams are usually complex interdisciplinary and temporary and as such the need for effective communication is crucial However published data regarding the manner in which individuals interact within the temporary project team is scarce with little other than anecdotal evidence available Recognizing this gap Communication in Construction Teams provides a comprehensive overview of the literature on interpersonal communication and delivers a critical review of various research methods previously used in and outside the construction management field Making use of Bales interaction process analysis IPA a tool used successfully in many fields to collect interaction data the text investigates the link between successful projects and the effectiveness of communication finding that participants in the construction process exhibit regular patterns of interaction and most significantly that there are different patterns of interaction associated with successful and unsuccessful projects Putting forward a number of practical suggestions to assist all actors involved in construction projects this insightful publication will be of interest to researchers in the fields of building design and construction management

Thinking

Through Communication Sarah Trenholm, 2020-08-23 The ninth edition of this textbook for hybrid introductory communication courses provides a balanced introduction to the fundamental theories and principles of communication. The book explores communication in a variety of contexts including interpersonal, group, organizational, and mass media and provides students the theoretical knowledge and the research and critical thinking skills they'll need to succeed in advanced communication courses and professions. The first section explores the history of communication study and explains basic perspectives used by scholars in the field. The second looks at how communicators decode and encode messages while the third examines channels and contexts from interpersonal to mass media. This edition devotes attention to how new technologies are changing the ways we think about communication with revised and updated examples and gives special attention to relevant critical theory. Two appendices give users the flexibility to tailor their courses to the interests and needs of their students offering guidelines for preparing and presenting public presentations and giving examples of major research methods. Thinking Through Communication is an ideal textbook for Introduction to Communication courses that aim to provide a comprehensive overview of the field. Material for instructors containing PowerPoint slides, test questions, and an instructor's manual is available at <https://routledge.com/9780367857011>. Readings in Groupware and Computer-supported Cooperative Work Ronald M. Baecker, 1993 This comprehensive introduction to the field represents the best of the published literature on groupware and computer-supported cooperative work (CSCW). The papers were chosen for their breadth of coverage of the field, their clarity of expression and presentation, their excellence in terms of technical innovation or behavioral insight, their historical significance, and their utility as sources for further reading. Sourcebook to the field development or purchase of groupware technology as well as for researchers and managers of groupware and human-computer interaction. *Bridging Research Disciplines to Advance Animal Welfare Science* Irene Camerlink, 2021-11-05 In recent years there has been a huge rise in interdisciplinary and multidisciplinary research in animal sciences which has accelerated improvements in animal welfare. Down to earth and practical, this book gives guidance on how cross-disciplinary research can advance animal welfare. The aim of the book is to help researchers and graduate animal science students to understand how to advance animal welfare through the integration of disciplines.
