The End of a Global Pox Bob H. Reinhardt, 2015-06-24 By the mid twentieth century smallpox had vanished from North America and Europe but continued to persist throughout Africa Asia and South America In 1965 the United States joined an international effort to eradicate the disease and after fifteen years of steady progress the effort succeeded Bob H Reinhardt demonstrates that the fight against smallpox drew American liberals into new and complex relationships in the global Cold War as he narrates the history of the only cooperative international effort to successfully eliminate a human disease Unlike other works that have chronicled the fight against smallpox by offering a biography of the disease or employing a triumphalist narrative of a public health victory *The End of a Global Pox* examines the eradication program as a complex exercise of American power Reinhardt draws on methods from environmental medical and political history to interpret the global eradication effort as an extension of U S technological medical and political power This book demonstrates the far reaching manifestations of American liberalism and Cold War ideology and sheds new light on the history of global public health and development

Rowlands, 2021 The philosopher Mark Rowlands takes a novel perspective on the problem of climate change and how to address it With energy consumption at the core of the issue he claims climate extinction and pestilence as three epoch

defining environmental issues of our time Rowlands proposes a single solution to all three breaking our collective habit of eating animals Bringing to bear analytic rigor and empirical data Rowlands argues that reversing the industrial farming of animals for our consumption will both significantly reduce energy emissions and allow for free space to aggressively reforest land being used by industrial animal farms to mitigate the effects of climate change [IR](#) James M. Mekong Medicine Richard W. Carlson, M.D.,2022-08-01 In 1966 Dr Richard Carlson two years out of medical school embarked on a year long tour in Vietnam to treat the many forgotten victims of the war the civilians During medical school he was introduced to the Los Angeles County General Hospital the huge institution that served LA s socially and medically deprived When drafted he applied to work in a Vietnamese civilian hospital His tenure at the LA hospital was the best training for what he would encounter in Vietnam His arrival coincided with a bloody escalation of the conflict But like many Americans he believed South Vietnam desired a democratic future and that the U S was helping to achieve that goal He diligently chronicled his efforts to save lives in the Mekong delta province of Bac Lieu and detailed the stories of the AMA volunteer doctors USAID nurses and corpsmen that he worked with to treat the local citizens many of whom were Viet Cong He gives a glimpse of the emerging understanding of post traumatic stress disorder and his team s development of a pioneering family planning clinic With more than 80 photographs this book relates hi efforts including the competition among civilians for medical services The facilities and equipment were primitive and the doctors efforts were often hampered by folk remedies and superstition

Making Spaces through Infrastructure Marian Burchardt,Dirk Laak,2023-07-04 Infrastructures are fundamental means through which societies create spaces but little is known about the precise ways in which this occurs How have infrastructures animated certain understandings of space How do infrastructures stabilize or undermine the spatial formats in which we live which shape our everyday practices and which regulate access to services and resources And conversely how do spaces frame the ways infrastructural provision is organized How do existing spaces shape infrastructural development and the scope and forms of access to vital services such as transport and water In this volume historians and sociologists draw on a range of fascinating case studies and provide compelling answers to these questions Exploring among others the provision of irrigation water in nineteenth century Los Angeles the invention of airport transit zones and the infrastructural practices of homeless people in Berlin the book demonstrates how the making of spaces through infrastructure is deeply political Intent on revealing uneven geographies of provision and hierarchies of access the contributors highlight how infrastructures are products of global entanglements

Germ Wars Melanie Armstrong,2017-01-17 The United States government has spent billions of dollars to prepare the

nation for bioterrorism despite the extremely rare occurrence of biological attacks in modern American history Germ Wars argues that bioterrorism has emerged as a prominent fear in the modern age arising with the production of new forms of microbial nature and the changing practices of warfare In the last century revolutions in biological science have made visible a vast microscopic world and in this same era we have watched the rise of a global war on terror Germ Wars demonstrates that these movements did not occur separately but are instead deeply entwined new scientific knowledge of microbes makes possible new mechanisms of war Whether to eliminate disease or create weapons the work to harness and control germs and the history of these endeavors provide an important opportunity for investigating how biological natures shape modern life Germ Wars aims to convince students and scholars as well as policymakers and activists that the ways in which bioterrorism has been produced have consequences for how people live in this world of unspecifiable risks 78. *St. Cyprian* Dunn, Geoffrey D.,2024 This volume contains his *De mortalitate* and *Ad Demetrianum* both dealing with a Christian understanding of pandemic a topic of international interest given the Covid experience of the last few years The former addresses concerns within the Christian community about why they are suffering as though they were being punished equally with non Christians and the second addresses non Christian concerns that Christian non participation in societal religious practice was responsible for the appearance of the pandemic There is an extensive introduction to the two works that situate them within Cyprian s literary output and within the history of pandemic The reader is invited to take the sense of powerlessness that was experienced in the early days of Covid to appreciate afresh how threatened people must have felt in a world without the medical capacity to combat disease *Discursive Perspectives in Therapeutic Practice* Andy Lock,Tom Strong,2012-04-05 For an endeavour that is largely based on conversation it may seem obvious to suggest that psychotherapy is discursive After all therapists and clients primarily use talk or forms of discourse to accomplish therapeutic aims However talk or discourse has usually been seen as secondary to the actual business of therapy a necessary conduit for exchanging information between therapist and client but seldom more Psychotherapy primarily developed by mapping particular experiential domains in ways responsive to human intervention Only recently though has the role that discourse plays been recognized as a focus in itself for analysis and intervention *Discursive Perspectives in Therapeutic Practice* presents an overview of discursive perspectives in therapy along with an account of their conceptual underpinnings The book starts by setting out the case for a discursive and relational approach to therapy by juxtaposing it to the tradition that that leads to the diagnostic approach of the DSM V and medical psychiatry It then presents a thorough review of a range of innovative discursive methods each presented by an authority in their respective area The book shows how discursive therapies can help people construct a better sense of their world and move beyond the constraints caused by the cultural preconceptions opinions and values the client has about the world The book makes a unique contribution to the philosophy and psychiatry literature in examining both the philosophical bases of discursive therapy whilst also showing how discursive perspectives can be applied in real therapeutic situations The

book will be of great value and interest to psychotherapists and psychiatrists wishing to understand explore and apply these innovative techniques
