

Statistics In Archaeology

Robert D. Drennan

Statistics In Archaeology:

Statistics in Archaeology Michael Baxter,2003-09-26 Statistics in Archaeology presents the particular statistical methodologies which can be used to address specific issues and problems in archaeology Through in depth case studies the author illustrates how such techniques can be employed in the archaeological context These examples are taken from a wide range of different countries and reflect the international nature of archaeology and its students and practitioners The technical level of the book is intermediate and is for the academic and professional archaeologist needing to know more about the statistical techniques available to them The structure and content of the book mean that it will also appeal to applied statisticians interested in how statistical methods can be used in different application areas [Statistics for Archaeologists](#) Robert D. Drennan,2009-08-11 In the decade since its publication the first edition of Statistics for Archaeologists has become a staple in the classroom Taking a jargon free approach this teaching tool introduces the basic principles of statistics to archaeologists The author covers the necessary techniques for analyzing data collected in the field and laboratory as well as for evaluating the significance of the relationships between variables In addition chapters discuss the special concerns of working with samples This well illustrated guide features several practice problems making it an ideal text for students in archaeology and anthropology Using feedback from students and teachers who have been using the first edition as well as another ten years of personal experience with the text the author has provided an updated and revised second edition with a number of important changes New topics covered include Proportions and Densities Error Ranges for Medians Resampling Approaches Residuals from Regression Point Sampling Multivariate Analysis Similarity Measures Multidimensional Scaling Principal Components Analysis Cluster Analysis Those already familiar with the clear and useful format of Statistics for Archaeologists will find this new edition a welcome update and the new sections will make this seminal textbook an indispensable resource for a whole new group of students professors and practitioners [Statistics in Archaeology](#) Michael Baxter,2010-05-24 Statistics in Archaeology presents the particular statistical methodologies which can be used to address specific issues and problems in archaeology Through in depth case studies the author illustrates how such techniques can be employed in the archaeological context These examples are taken from a wide range of different countries and reflect the international nature of archaeology and its students and practitioners The technical level of the book is intermediate and is for the academic and professional archaeologist needing to know more about the statistical techniques available to them The structure and content of the book mean that it will also appeal to applied statisticians interested in how statistical methods can be used in different application areas [Statistics for Archaeologists](#) Robert D. Drennan,1996 Taking a jargon free approach this guidebook introduces the basic principles of statistics to archaeologists The author covers the necessary techniques for analyzing data collected in the field and laboratory as well as for evaluating the significance of the relationships between variables In addition chapters discuss the special concerns of working with samples This well

illustrated guide features several practice problems making it an ideal text for students in archaeology and anthropology

Statistics for Archaeologists Robert D. Drennan, 2009-08-21 In the decade since its publication the first edition of *Statistics for Archaeologists* has become a staple in the classroom Taking a jargon free approach this teaching tool introduces the basic principles of statistics to archaeologists The author covers the necessary techniques for analyzing data collected in the field and laboratory as well as for evaluating the significance of the relationships between variables In addition chapters discuss the special concerns of working with samples This well illustrated guide features several practice problems making it an ideal text for students in archaeology and anthropology Using feedback from students and teachers who have been using the first edition as well as another ten years of personal experience with the text the author has provided an updated and revised second edition with a number of important changes New topics covered include Proportions and Densities Error Ranges for Medians Resampling Approaches Residuals from Regression Point Sampling Multivariate Analysis Similarity Measures Multidimensional Scaling Principal Components Analysis Cluster Analysis Those already familiar with the clear and useful format of *Statistics for Archaeologists* will find this new edition a welcome update and the new sections will make this seminal textbook an indispensable resource for a whole new group of students professors and practitioners

Quantitative Analysis in Archaeology Todd L. VanPool, Robert D. Leonard, 2011-01-06 *Quantitative Analysis in Archaeology* introduces the application of quantitative methods in archaeology It outlines conceptual and statistical principles illustrates their application and provides problem sets for practice Discusses both methodological frameworks and quantitative methods of archaeological analysis Presents statistical material in a clear and straightforward manner ideal for students and professionals in the field Includes illustrative problem sets and practice exercises in each chapter that reinforce practical application of quantitative analysis

Quantitative Methods in Archaeology Using R David L. Carlson, 2017-06-26 *Quantitative Methods in Archaeology Using R* is the first hands on guide to using the R statistical computing system written specifically for archaeologists It shows how to use the system to analyze many types of archaeological data Part I includes tutorials on R with applications to real archaeological data showing how to compute descriptive statistics create tables and produce a wide variety of charts and graphs Part II addresses the major multivariate approaches used by archaeologists including multiple regression and the generalized linear model multiple analysis of variance and discriminant analysis principal components analysis correspondence analysis distances and scaling and cluster analysis Part III covers specialized topics in archaeology including intra site spatial analysis seriation and assemblage diversity

Digging Numbers Mike Fletcher, Gary R. Lock, 2005 This fully revised second edition retains the hands on simple approach of the first edition but with some significant modifications Still covered in detail are descriptive and inferential techniques with each one worked through by hand on a common data set but new is a chapter covering an introduction to multivariate techniques A new section provides SPSS PC programs designed with the beginner in mind This

book provides a practical manual to enable any archaeologist to start using statistics as well as some more thoughtful considerations of the strengths and weaknesses of statistical methods and the results produced *Handbook of Archaeological Methods* Herbert D. G. Maschner, Christopher Chippindale, 2005 The Handbook of Archaeological Methods comprises 37 articles by leading archaeologists on the key methods used by archaeologists in the field in analysis in theory building and in managing cultural resources The book is destined to become the key reference work for archaeologists and their advanced students on contemporary archaeological methods **Uses and Abuses of Statistics in Archaeology**, 1964
