

Steady and Unsteady States

- **Steady state:** implies *no change with time*.
- **Unsteady state:** or *transient*, the opposite of steady state (*there is change with time*).
- **The steady-flow process:**
a process during which a fluid flows through a control volume steadily (mass, volume and total energy content of the control volume remain constant).
However, the fluid properties can change from point to point within the control volume, but at any fixed point they remain the same during the entire process
