Chappell, James Lubben, 2001-04-01 With longer life expectancy most countries are now experiencing rapid ageing among their populations Ethnic Chinese populations are no exception to these demographic transformations During the twentieth century there has been a wide dispersion of Chinese people throughout the world as well as dramatic socio-political changes within China These unique factors have strained traditional filial norms and necessitated a re-examination of intergenerational relationships and the roles of elderly Chinese people This book investigates the varied adaptations of social support systems and social integration among ageing Chinese populations within a diverse set of countries in the Pacific Rim region The book is a collection of scholarly papers addressing such topics as community care family support one-child families and social isolation Each paper illustrates the importance of social support networks and social integration to the quality of life for elderly Chinese persons living in dissimilar circumstances *The Cinema of Jia Zhangke* Cecília Mello, 2019-07-25 Shortlisted for the BAFTSS 2020 Award for Best Monograph Despite his films being subjected to censorship and denigration in his native China Jia Zhangke has become the

country's leading independent film director internationally. Seen as one of world cinema's foremost auteurs, he has played a crucial role in documenting and reflecting upon China's era of intense transformations since the 1990s. Cecilia Mello provides an in-depth analysis of Jia's unique body of work from his early films *Xiao Wu* and *Platform* to experimental quasi-documentary *24 City* and the audacious *Mountains May Depart*. Mello suggests that Jia's particular expression of the realist mode is shaped by the aesthetics of other Chinese artistic traditions, allowing Jia to unearth memories both personal and collective still lingering within the ever-changing landscapes of contemporary China. Mello's groundbreaking study opens a door into Chinese cinema and culture, addressing the nature of the so-called impure cinematographic art and the complex representation of China through the ages. Foreword by Walter Salles. *The Development of Eco Cities in China*. Juke Liu, Weiping Sun, Wenzhen Hu, 2016-10-17. This book presents an in-depth study on and summary of the current practice and theories for the construction of eco-cities in China in the context of the country's rapid urbanization. It argues that by 2020 60% of China's population will live in cities. And the evolution from green cities to eco-cities and subsequently to smart cities is crucial to China's sustainable development. The book presents a feasible and objective quantitative evaluation system for the sustainable and healthy development of eco-cities. It summarizes the Chinese experience in building eco-cities as the coordinated development of economy, society, resources, and environment, with the goal being to make cities inclusive, safe, resilient, and sustainable. This is essential to achieving a number of the United Nations Sustainable Development Goals. In addition, the book defines the current stage of development Chinese cities have reached in terms of ecological construction and offers guidance on selecting suitable urban ecological construction modes and improvement approaches. It provides a valuable reference source and guidebook for research on and the practice of eco-city construction. Accordingly, it will help other countries around the world, especially the developing countries, to benefit from China's successful experience.

Innovation in China. Richard P. Appelbaum, Cong Cao, Xueying Han, Rachel Parker, Denis Simon, 2018-10-15. China is in the midst of transitioning from a manufacturing-based economy to one driven by innovation and knowledge. This up-to-date analysis evaluates China's state-led approach to science and technology and its successes and failures. In recent decades, China has seen huge investments in high-tech science parks, a surge in home-grown top-ranked global companies, and a significant increase in scientific publications and patents. Helped by state policies and a flexible business culture, the country has been able to leapfrog its way to a more globally competitive position. However, the authors argue that this approach might not yield the same level of progress going forward if China does not address serious institutional, organizational, and cultural obstacles. While not impossible, this task may well prove to be more difficult for the Chinese Communist Party than the challenges that China has faced in the past. **China Road**. Rob Gifford, 2011-05-15. Running 3,000 miles from the east coast boomtown of Shanghai to the border of Kazakhstan in the north-west, Route 312, China's Route 66, is a road that Rob Gifford has always wanted to travel. Gifford's journey and his desire to get to the heart of this country make *China Road* an

outstanding and funny travel narrative part pilgrimage part reportage which illuminates a country on the move
