The authors' clear conversational approach not only orients students to the challenges of clinical training but also enhances their ability to learn from these experiences. *Translating Theory into Practice* covers all aspects of counselor training from the core relationships that are essential to professional development to workable suggestions on selecting a field site, managing cases, terminating with clients, and networking with other mental health professionals. Vignettes and sample dialogues highlight real-world ethical issues and counseling concerns. The text also includes relevant information on state licensing requirements and national standards as well as several major codes of ethics. With insights gleaned from years of both teaching and professional counseling practice, the authors equip students with the skills they need to reap the full benefits that practicum and internship afford.

Book Jacket [Personal Process in Child-Centred Play Therapy](#)
 David Le Vay, Elise Cuschieri, 2022-09-02 *Personal Process in Child-Centred Play Therapy* provides a very specific exploration of the play therapy process from the personal perspective of the play therapist. This volume examines the personal challenges, opportunities, losses, and gains, and numerous obstacles that one has to negotiate through the course of both training to become a play therapist and working as a qualified clinician with children who have complex life difficulties. The book aims to offer a forum within which the role, function, and process of the personal within play therapy can be explored. Bringing together a number of experienced play therapists, the book shares often deeply personal accounts of their experience of training and clinical practice. Chapters challenge the unspoken therapist taboos of shame, childhood trauma, vulnerability, and grief, shining a light on the more hidden areas of therapist experience. Clinical issues around the unconscious process are also explored but once again from the personal position of the play therapist rather than the child. With a unique and distinct perspective on the therapeutic process, this book is specifically intended for both trainee and experienced play therapists but will be relevant to all psychotherapists involved in working therapeutically with children and young people.
