Pedagogies for Future-Oriented Adult Learners Helen Bound, Jennifer Pei-Ling Tan, Rebekah Lim Wei Ying, 2022-03-16 This book presents a collection of chapters both empirical and conceptual that challenge existing paradigms of learning and teaching provides examples of pedagogical spaces and practices that nurture future oriented learners explicates identities and transitions in learning and offers alternative frames for moving forward Educational structures have proven remarkably resilient More often than not pedagogical designs still privilege the lecture tutorial format front end loading and the positioning of the teacher as expert In a similar vein pedagogical spaces tend to privilege the formal educational institution and its discourses rather than productively engage with naturally occurring learning spaces at work

and in communities To better prepare and support learners for dynamically changing futures we need to truly flip the lens from teaching to learning positioning at the core the learner in contexts where learning and becoming occurs This means considering what counts as a future oriented learner and educator recognising the importance of evolving identities transitions and pathways that facilitates the processes of being and becoming Equally important is the design and appropriation of pedagogical spaces and practices that are in themselves dynamic and future oriented This book questions the current delineation between the spaces of work learning and communities
