homicide unit is meticulously re-creating Hollywood's most famous and most gruesome death scenes. The first murder is caught on film, spliced into a rented VHS edition of the Hitchcock black and white masterpiece *Psycho*. But in place of Janet Leigh is a real-life woman, and this time the blood is red and the knife is real. Soon more thrilling classics are turned into terrifying snuff films and placed on video store shelves for an unsuspecting public to find. The key to this horrific puzzle could lie with any of The Skin Gods' supporting cast: the A-list Hollywood director, the ruthless executive assistant, the convicted mass murderer, or perhaps someone else who has made a sinister art of gruesome violence. Hot on the psychopath's trail, Balzano and Byrne descend into the mouth of madness and beyond deep into the depraved underworld of S.M. clubs and the porn industry where the worship of flesh leads to malevolent evil. Before the final credits roll, the investigators will discover that none of The Actor's victims are as innocent as they appear to be, and that the clue the police need to prevent future murders might be found in Detective Byrne's own dark past.

Literature, Science and Exploration in the Romantic Era Tim Fulford, Debbie Lee, Peter J. Kitson, 2004-09-02. In 1768, Captain James Cook made the most important scientific voyage of the eighteenth century. He was not alone: scores of explorers like Cook, travelling in the name of science, brought new worlds and new peoples within the horizon of European knowledge for the first time. Their discoveries changed the course of science. Old scientific disciplines such as astronomy and botany were transformed; new ones like craniology and comparative anatomy were brought into being. Scientific disciplines in turn pushed literature of the period towards new subjects, forms, and styles. Works as diverse as Mary Shelley's *Frankenstein* and Wordsworth's *Excursion* responded to the explorers and scientists' latest discoveries. This wide-ranging and well-illustrated study shows how literary Romanticism arose partly in response to science's appropriation of explorers' encounters with foreign people and places, and how it in turn changed the profile of science and exploration.

*As American as Mom, Baseball, and Apple Pie* Linda J. Holland-Toll, 2001. This book does nothing less than redefine the very genre of horror fiction, calling into question the usual conventions, motifs, and elements. Unlike many critics of this genre, Linda Holland-Toll sees disaffirmative horror fiction acting neither to soothe fears nor reduce them to the vicarious thrills-and-chills mode, but as intensifying the fears inherent in everyday life.
