Montgomery,2022-03-29 The Moon is at once a face with a thousand expressions and the archetypal planet Throughout history it has been gazed upon by people of every culture in every walk of life From early perceptions of the Moon as an abode of divine forces humanity has in turn accepted the mathematized Moon of the Greeks the naturalistic lunar portrait of Jan van Eyck and the telescopic view of Galileo Scott Montgomery has produced a richly detailed analysis of how the Moon has been visualized in Western culture through the ages revealing the faces it has presented to philosophers writers artists and scientists for nearly three millennia To do this he has drawn on a wide array of sources that illustrate mankind s changing concept of the nature and significance of heavenly bodies from classical antiquity to the dawn of modern science Montgomery especially focuses on the seventeenth century when the Moon was first mapped and its features named From literary explorations such as Francis Godwin s Man in the

Moone and Cyrano de Bergerac's *L'autre monde* to Michael Van Langren's textual lunar map and Giambattista Riccioli's *Almagestum novum* he shows how Renaissance man was moved by the lunar orb how he battled to claim its surface and how he in turn elevated the Moon to a new level in human awareness The effect on human imagination has been cumulative our idea of the Moon and therefore the planets is multilayered and complex having been enriched by associations played out in increasingly complicated harmonies over time We have shifted the way we think about the lunar face from a perfect body to an earthlike one with corresponding changes in verbal and visual expression Ultimately Montgomery suggests our concept of the Moon has never wandered too far from the world we know best the Earth itself And when we finally establish lunar bases and take up some form of residence on the Moon's surface we will not be conquering a New World fresh and mostly unknown but a much older one ripe with history *Environment, Space, Place - Volume 2, Issue 1 (Spring 2010)* Gary

Backhaus,2010-01-01 **Women Who Fly** Serinity Young,2018-01-02 Flying women are a common motif in the world's myths and religions Not necessarily winged these women elicit reactions of fear fascination and ambivalence and in so doing reveal much about the perceptions of female power and sexuality through the ages The first book to systematically chronicle the figure of the flying woman in myth literature and art *Women Who Fly* sheds new light on the ways in which women have both influenced and been understood by society and religious traditions around the world *Sun Moon Earth* Tyler

Nordgren,2016-09-13 With beautiful illustrations and a detailed map *Sun Moon Earth* has everything you need to get ready for the next solar eclipse On April 8 2024 millions of Americans will experience an awe inspiring phenomenon a total eclipse of the sun In *Sun Moon Earth* astronomer Tyler Nordgren illustrates how this most seemingly unnatural of natural phenomena was transformed from a fearsome omen to a tourist attraction From the astrologers of ancient China and Babylon to the high priests of the Maya *Sun Moon Earth* takes us around the world to show how different cultures interpreted these dramatic events Greek philosophers discovered eclipses cause and used them to measure their world and the cosmos beyond Victorian era scientists mounted eclipse expeditions during the age of globe spanning empires And modern day physicists continue to use eclipses to confirm Einstein's theory of relativity Beautifully illustrated and lyrically written *Sun Moon Earth* is the ideal guide for all eclipse watchers and star gazers alike **Archetypes and Motifs in Folklore and Literature: A**
