Alt,Timothy R.

Pauketat,2019-08-05 The future of humanity is urban and knowledge of urbanism s deep past is critical for us all to navigate

that future The time has come for archaeologists to rethink this global phenomenon by asking what urbanism is and more to the point was Can we truly understand ancient urbanism by only asking after the human element or are the properties and qualities of landscapes materials and atmospheres equally causal The nine authors of *New Materialisms Ancient Urbanisms* seek less anthropocentric answers to questions about the historical relationships between urbanism and humanity in Africa Asia and the Americas They analyze the movements and flows of materials things phenomena and beings human and otherwise as these were assembled to produce the kinds of complex dense and stratified relationships that we today label urban In so doing the book emerges as a work of both theory and historical anthropology It breaks new ground in the archaeology of urbanism building on the latest New Materialist relational ontological and realist trends in social theory This book challenges a new generation of students to think outside the box and provides scholars of urbanism archaeology and anthropology with a fresh perspective on the development of urban society

Lekson, 1999-03-24 Southwestern archaeologists have long pondered the meaning and importance of the monumental 11th century structures in Chaco Canyon Now Stephen H Lekson offers a lively provocative thesis which attempts to reconceptualize the meaning of Chaco and its importance to the understanding of the entire Southwest Chaco was not alone according to Lekson but only one of three capitals of a vast politically and economically integrated region a network that incorporated most of the Pueblo world and that had contact as far away as Central America A sophisticated astronomical tradition allowed for astrally aligned monumental structures great ceremonial roads and upon the abandonment of Chaco Canyon in the 12th century the shift of the regional capital first to the

Aztec site then Paquime all located on precisely the same longitudinal meridian Lekson's ground breaking synthesis of 500 years of Southwestern prehistory with its explanation of phenomena as diverse as the Great North Road macaw feathers Pueblo mythology and the rise of kachina ceremonies will be of great interest to all those concerned with the prehistory and history of the American Southwest

**Origins of the Sphinx** Robert M. Schoch, Robert Bauval, 2017-03-16 New research and evidence that the Sphinx is thousands of years older than previously thought Contrasts what Egyptologists claim about the Sphinx with historical accounts and new research including reanalysis of seismic studies and updates to Schoch's water weathering research and Bauval's Orion Correlation Theory Examines how the Sphinx is contemporaneous with Gbekli Tepe aligned with the constellation Leo and was recarved during the Old Kingdom era of Egypt Reveals that the Sphinx was built during the actual historical Golden Age of ancient Egypt the period known in legend as Zep Tepi No other monument in the world evokes mystery like the Great Sphinx of Giza It has survived the harsh climate of Egypt for thousands of years and will remain long after our own civilization is gone According to orthodox Egyptology the Sphinx was built around 2500 BCE as a memorial to the pharaoh Khafre Yet this fact has scant to no supportive evidence When was the Sphinx really built and most importantly why In this provocative collaboration from two Egyptology outsiders Robert M Schoch Ph D and Robert Bauval combine their decades of research to show how the Sphinx is thousands of years older than the conventional Egyptological timeline and was built by a long forgotten pre Pharaonic civilization They examine the known history of the Sphinx contrasting what Egyptologists claim with prominent historical accounts and new research including updates to Schoch's geological water weathering research and reanalysis of seismic studies Building on Bauval's Orion Correlation Theory they investigate the archaeoastronomical alignments of the monuments of the Giza Plateau and reveal how the pyramids and Sphinx were built to align with the constellations of Orion and Leo Analyzing the evidence for a significantly older construction phase at Giza and the restoration and recarving of the Sphinx during the Old Kingdom era they assert that the Sphinx was first built by an advanced pre Pharaonic civilization that existed circa 12 000 years ago on the Giza Plateau contemporaneous with the sophisticated Gbekli Tepe complex The authors examine how the monuments at Giza memorialize Zep Tepi the Golden Age of legend shown here to be an actual historical time period from roughly 10 500 BCE through 9700 BCE Moving us closer to an understanding of the true age and purpose of the Great Sphinx Schoch and Bauval provide evidence of an early high civilization witnessed by the Great Sphinx before the end of the last ice age
